CHAPTER IV

CONCLUSION AND SUGGESTION

4.1. Conclusion

This chapter draws conclusion based on the discussion in the previous chapter. The researcher wants to give conclusion of this research that was written from the starting until finishing. in the first part the researcher describes the actantial scheme. In the actantial scheme, the researcher describes three binary position, which is Sender and receiver, Subject and Oject, Helper and Opposant. The actantial describes when Lord Elrond (The sender) gives the order to Frodo Baggins (the subject) to take the main ring (The Object) into the land of Mordor (The Receiver) in order to defeat the enemy and make a peace.

After analyzing the novel using Griemas's actantial model, the researcher continues to the next step which is using the functional model. In the functional model, the researcher describes a table which contains step of functional model; Initial situation, Transformation (including three stage; Proficiency stage, the main stage, stage of glory), and the last step is Ending situation. The functional model explains the plot of the story in *The Lord of The Ring : The Fellowships of The Ring* novel. Start from the beginning situation in shire, the ring become Frodo's, journey to Rivendell, meets another helper, and has a task from Lord Elrond(the sender) to take the main ring (the object) into the land of Mordor (receiver).

4.2. Suggestion

As the researcher only analyzes *The Lord of The Ring : The Fellowships of The Ring's novel* with Griemas actantial and functional model, the researcher suggests the reader to analyze other aspect in *The Lord Of The Rings* novel because this novel so interesting.

Finally the researcher hopes that this result of research will be useful for future improvement of studying literature. Enrich reader knowledge and it can be utilized as one of references.
