CHAPTER V

CONCLUTION AND SUGGESTION

5.1 CONCLUTION

This chapter presented the conclusion of the research base on the analysis and discussion explained in the previous chapter. One of the distinctive properties of human language is creativity by which we mean the ability of native speakers of a language to produce and understand new form in their language. Even though creativity is most apparent when it comes to sentence formation. It is also manifest in our lexical knowledge where new words are added to our mental lexicon regularly.

After analyzing the word formation processes of Indonesian slang words, the finding showed that there were 32 Indonesian slang words find in BlackBerry Messenger. There were 4 types of word formation processes, namely Blending, Borrowing, Clipping, and Multiple processes. Among the four word formation processes, the multiple processes were the most frequent word formation processes. The process of the multiple processes were used 50 %of the total Indonesian slang words. The researcher only found 4 types out of 11 types of word formation in forming Indonesian slang words because dominantly Indonesian slang words were borrowed from other languages, especially English as the major. Then, for making easier and simpler to be uttered in the application, Indonesian slang words using the process of clipping and blending.

Based on finding above (Table 1.), multiple process is the highest process in slang word used by teeneger on BlackBerry Messanger. The highest combination patterns of multiple processes is Borrowing with the tendency of the usage of Borrowing processes in the 5 patterns. Borrowing process is needed on the basis teenager need to be cool at all points of their life. As we know English as an international language, this condition refers that the usage of English in the application of Indonesian slang words can be said as a pride for the users.

5.2 SUGGESTION

The result of this study are not cover all about lword formation processaltough the meaning of slang words which are used by teenager in BlackBerry Messenger. This study far from completenss, at least can be know about word formation process in slang words by analyze and discuss the word formation in. The researcher believes many linguistic theory that can be used to suuport and develop in the next study related to word formation process. the researcher suggest for the next study can do the same study with the new developing give information about word formation process and the meaning of slang words used. The next study should have much time in giving the deep information about word formation because it related with other theory is not easy to identified in the slang object.
