CHAPTER V

CONCLUSION AND SUGGESTION

This chapter includes two section, they are conclusion and suggestion. Both of them are as the result of this research which entitled "a study of person deixis used in "*Ini Talk Show*" program". It presents the types of person deixis that found in *Ini Talk show* program. And suggestion is the information for the student for making this research more perfect. All of them will be formulated as following.

5.1 Conclusion

In the previous chapter, the researcher has explained about three types that used by the participant in *Ini Talk Show* program, they are: first person deixis (singular and plural), second person deixis (singular), and third person deixis (singular and plural). After analyzing the data, it can be seen that the person deixis which points to the first person which uttered by the participant are: *saya, aku, gua/gue* (singular), *kami, kita* (plural). Both of the words *kami* and *kita* are different in meaning. The deictic word *kami* used to indicate the speaker excluded the hearer, while the deictic word *kita* used to indicate the speaker included the hearer. The second type that found in *Ini Talk Show* is the second person deixis which refers to the addressee. The deictic words that uttered by the participant in this show are: *kamu/-mu, kau, elu/lu* which all of them functioned to indicate the addressee. And the last type of person deixis that found in this talk show is the third person deixis which

refers to the person other than the speaker and the addressee. The deictic words of it, they are: *dia, -nya, mereka.*

From the analyzed data, all of the person deixis used by the participants in *Ini Talk Show* program appears 186 times. The first person deixis used by the participants 105 times, the second person deixis used by the participants 47 times, and the third person deixis used by the participants 34 times.

So it can be concluded that the first person deixis is dominant used by the participant in *Ini Talk Show* program. And the dominant deictic word of first person deixis is *saya*. This word used by host and co-host to show their respect to the guest stars that invited to the show. In addition, by understanding well about person deixis, we can avoid misunderstanding and misinterpreting of it, especially in the verbal language.

5.2 Suggestion

This section provides several suggestions on basis delimitation of the present study. First, this study only focuses on talk show in Indonesia TV channel. The researcher hopes that the next study may analysis about talk show not only in Indonesia, but also the talk show in abroad. This study only focuses on the first person deixis in Indonesia talk show. The researcher hopes that the next study may conduct five types of deixis in order to makes this research perfect and great.
