## **CHAPTER V**

## CONCLUSION AND SUGGESTION

After obtaining the findings and analyzing the data in the previous chapter. In this chapter, the researcher presents the conclusion of the language usage by the sufferer of bipolar disorder in "Silver Linings Playbook" movie. And also gives suggestion for the future researcher.

## 5.1 Conclusion

This research is about the language usage by the sufferer of bipolar disorder in "Silver Linings Playbook" movie. The researcher do this research focused on the main character *Pat* as the sufferer of bipolar disorder in the movie. The researcher used descriptive qualitative approach in this study. Because the researcher found and analyzed language usage by the sufferer of bipolar disorder in "Silver Linings Playbook" movie. And the instrument of this this research is the researcher itself.

The researcher finding the data with devine movie as 40 scenes, but not all the scenes being the data. The researcher only used 10 scenes as her data, because some of data almost same situation. After that, the researcher divided 10 scenes into two part; receptive language disorder and expressive language impairment.

Based on the findings and discussions, there are some conclusions:

- 1. Receptive language impairment means some people who has difficulties with understanding what is said to them. One of characteristics that occur to some people who had a receptive language impairment is difficulty in understanding figurative language and words with multiple meanings. Such as the researcher found in the *data 1 (scene 5)*, *data 2 (scene 5)*, *data 3 (scene 5)*, *data 4 (scene 4)*, *data 5 (scene 5)*, *data 6 (scene 10)*.
- 2. Expressive language impairment means some people who has problems using oral language or talking. Expressive language may lack variation in intonation or volume. Imaginative play and social use of language may be further impaired. People who had an expressive language impairment may also have difficulties in describing, defining and explaining, and in retelling stories/events. A person with expressive language disorder has difficulty using language. Such as researcher found in the data 7 (scene 1), data 8 (scene 3), data 9 (scene 8), data 10 (scene 10), data 11 (scene 13), data 12 (scene 14).
- 3. The differences of the language usage by the sufferer of bipolar disorder when bipolar and non-bipolar. *Pat* as the sufferer of bipolar disorder in "Silver Linings Playbook" movie and also the main character of this movie. He suffered bipolar disorder 1, it means his disease include on the maniac condition. Which the sufferer will have a mood swings extremely "up" or high enthusiasm. When *Pat* in bipolar condition, he will talk too much with run-on sentences to explain many words or ideas in his brain.

And he didn't stop before deliver what he mean. Such as the researcher find in the *data 13 (scene 8)*. When *Pat* in normal condition, he can not be the good listener. Although his bipolar disorder does not relapse, the language usage of *Pat* still had a little impairment. Because he still carried the influence of his bipolar disorder. Such as the researcher find in the *data 14 (scene 9), data 15 (scene 15)*.

From this research, the researcher results that the language usage by the sufferer of bipolar disorder in "Silver Linings Playbook" movie have a receptive language impairment and expressive language impairment, such as mentioned in the theory of language disorder that used by the researcher to findings and analyzing the data. But, the sufferer of bipolar disorder in this movie often meet in expressive language impairment. Because the sufferer of bipolar disorder in this movie have bipolar disorder 1 that called maniac episode. And maniac episode often have expressive language disorder by the sufferer of bipolar disorder.

## **5.2 Suggestion**

At the end of this study, the researcher would like to offer some suggestions for the future researcher. Study about language usage by the sufferer of bipolar disorder can be analyzed with many aspects of linguistics field. The next researcher who wants to analyze the same subject about language disorder, they can analyze more detail from different linguistics field. They can do their research from any aspects that their wanna do and they believe can do it with the

best of their ability. In addition, to differ with the previous researcher, the next researcher can use another subject. It can be movie, novel, etc.
