## **CHAPTER V**

## **CONCLUSION AND SUGGESTION**

This chapter presents the conclusion of the research and suggestion as the last chapter. The conclusion is based on the analysis in the previous chapter to answer the statement of problem in this research, while the suggestion is to give information to the next researcher who is interested in doing research about deixis.

## **5.1 Conclusion**

After discussing the findings, the writer would like to give the conclusion about Person Deixis Used by Bradley Simpson and Michael Clifford on Twitter. The result of this research is to answer the problem formulated by the researcher.

In this study, the writer analyzed the types of person deixis and the references used by Bradley Simpson and Michael Clifford on Twitter. According to Yule (1996), person deixis includes the speaker and the addressee and is used in a basic three-part division: first person (singular and plural pronouns), second person, and third person (singular and plural pronouns). The writer also compared the use of person deixis by both Michael Clifford and Bradley Simpson because they have different ways in applying person deixis.

From the previous chapters, the writer found five types of person deixis used by The Vamps' Bradley Simpson and 5 Seconds of Summer's Michael Clifford: singular first person deixis (88 items from Bradley Simpson and 151 items from Michael Clifford); plural first person deixis (13 items from Bradley Simpson and 21 items from Michael Clifford); second person deixis (47 items from Bradley Simpson and 58 items from Michael Clifford); singular third person deixis (5 items from Bradley Simpson and 4 items from Michael Clifford); and plural third person deixis (6 items from Bradley Simpson and 3 items from Mchael Clifford). The writer stated that singular first person deixis is the most dominant type of person deixis applied in both accounts. In the last of the research, the writer also investigated the similarities and differences of person deixis usage by Bradley Simpson and Michael Clifford such as having same highest frequency of person deixis usage and applying the use of second person deixis in their own way.

## **5.2 Suggestion**

Based on the results, the suggestions are addressed to the readers. For further research, other social media such as Path or Tumblr can be used to analyze person deixis. Nowadays, Path and Tumblr have important role for sharing opinion. Thus, analyzing the use of person deixis on Path or Tumblr will be interesting for other researchers.

Investigating the use of social deixis by public figure on Instagram can also be applied for further study. This kinds of deixis relate to context and culture from different countries. By investigating social deixis, we can compare the difference of culture that influence the use of social deixis. For example, Western does not have any special calling for sibling while Indonesia has special calling for sibling to show respect and politeness.
