CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

The data in this research is utterances within conversation used by the main character in ''magic hour'' movie. The data include in flouting maxim. The source of data is a movie directed by Asep Kusdinar 2015 entitled ''magic hour''. The movie is gotten from ''you tube''. This movie is categorized romantic movie that produced by Sukhdev Singh Wicky V. Olindo. This movie adapted from novel the title *Magic Hour: Let In The Unexpected* By Tisa TS.

After obtaining and analyzing the data in chapter IV, the researcher concluded that there are 21 utterances flouted the maxim by the main character. In this study, the researcher found the main character 2 flouted the maxim of quality, 5 flouted maxim of quantity, 12 flouted the maxim of relevant and 2 flouted the maxim of manner. It can conclude that the main character often flouted the maxim of relevant. And also the researcher found there are some purposes why the main character flouted the maxim. They are to give more explanation, to stressing something, to avoid talking about something, to change the conversation topic. To hiding something, to annoying, to avoid the bad situation, to get explanation and to be clear.

From this research can be known that the main character often flout the maxim of relevant, and followed by flouting maxim of quantity and the last followed by flouting maxim of quality and flouting maxim manner that occurs only utterance. Flouting maxim of relevant often used because, the participant often change the topic, avoid talking about the topic when she does conversation. The main c 63 flouted the maxims of qua she often give a contribution too little or too much information to the hearer.

The similarity of this study with the some previous studies are used the movie as object study. To analyze the flouting maxim used Grice's theory about cooperative principle and used descriptive method to analyze. And the difference from previous studies with this research is in this study focused analyzed flouted the maxim by only one character it is the main character. Whether in previous studies analyzed flouted maxim by all characters.

5.2 Suggestion

Based on the study, the researcher suggests to the next researchers that want to know and understand deeper about flouting maxim field to analysis the flouting maxim not only in a movie but also analyzed in other area. The researcher also recommends to uses Grice's theory to conduct the research within other topic. Other researchers can analyze flouting maxim in more specific are because many researchers only focus on all the types flouting maxims. The other researcher can choose one or two the types of flouting maxim to be analyze. Such as, the other researcher can focused to analyze only one or two flouting maxim of quality. They can analyze with other statement problem.

Therefore, the writer suggest to the reader to have interest in study pragmatics that can be fulfilled as the maxim required of the theory cooperative principle. From those we can investigate about the aspect of meaning at very scope of science.

Finally, the writer hopes hope that this study gives benefit for the English Department, especially student in State Islamic University of Sunan Ampel Surabaya who want to analyze cooperative principle. It can be knowledge to the reader that flouted maxim not only happened in daily life but also in the movie. And also it can be reference and alternative information to other researcher.
