2. Problem Faced By Student In Teaching Learning Process Of Speaking

From the result of interview with the student, student faced any problem in learning of speaking. Like student have limited vocabulary, students feel difficult to express their opinion, student feel difficult to choose the appropriate tenses, student feel difficult arrange the right sentences to speak, student feel difficult to pronoun the word, and they haven't partner in speaking English. Actually students want to be active in speaking English. The proof is student method to overcome their problems. Like student try to speaking English with their self in front of the mirror. And another effort that done by student is they always ask the teacher if they don't know about the meaning of the word or grammar difficulties. As the researcher mentioned above student must be more trying to active in speaking English. Its mean that student must have big motivation to can speak English. And the researcher mentions if student want to have good speaking they should follow the speaking course or intensive conversation activity. From the result of the questionnaire the researcher would be analyze one by one.
