

CHAPTER V

CONCLUSSION AND SUGGESTION

Chapter V is about conclusion and suggestion by the writer for the research.

A. Conclusion

Based on the result in chapter IV, the researcher takes the conclusion to answer the problem of the study as below:

The result of the research which has been analyzed by statistical analysis using “t” test and the result of $t_0 = 6,71$ based on t_{label} in significant level of $5\% = 2,04$ and significant level of $1\% = 2,75$. Therefore, t_0 is greater than t_{label} . It shows that there are significant differences between students' score who sit in the front and the back row in English achievement at the grade eight of SMPN I Plemahan Kediri 2010-2011 academic year.

B. Suggestion

The writer wants to give the suggestion to the English teacher and the students at the eighth grade of SMPN I Plemahan Kediri.

1. The English teacher, it is hoped he or she changes students' seats periodically.

Thus, all students have an equal opportunity to sit in the front or other rows. Besides, English teacher need to change seating arrangement style based on the class activity. This step is hoped to create a comfort situation in the class and students do not get bored with monotonous seating arrangement. Therefore, as teacher, they have to realize how to arrange a good seat that is

appropriate with students' condition, because it has relationship with students' success in teaching and learning.

2. For the students at the grade eight of SMPN I Plemahan Kediri in the 2010-2011 academic year. Wherever they have seat and whatever their seating arrangement style is implemented at school, they have to pay attention to teacher's explanation in order they get good achievement in all subjects especially in English lesson.
