ABSTRACT

Suhermanto, Ma'ruf. (2018). Register Used By The Main Character of

The Movie "In The Heart Of The Sea". English Department, Faculty of Arts and Humanities. The State Islamic University of Sunan Ampel Surabaya.

Thesis Advisor : Dr. A. Dzo'ul Milal, M.Pd.

Key Words : Register, Field, Tenor, Mode.

This Thesis investigates the use of register by the characters inside the movie titled "In the Heart of The Sea (2015)". The researcher finds lot of forms of register from its word classes until its application on their daily activity during works. Lot of terms consists of one or two unique and strange words giving the real sense that the register only used by the old-style sailormen. Various meaning of register and the relation between the user and register they uses are important points to analyze.

Using qualitative-descriptive method, the researcher picked the original dialogues of the movie formed as script. Then, the researcher identifies the registers that formed as terms using the light marker and written down the speaker besides the register following by the context. The researcher collected the register in the table completed with the columns of the speaker, register and its meaning. In how to analyze the data, there are two steps of analysis: First, the researcher analyzes the meaning of register using Halliday's theory including field, tenor, and mode. Second, the researcher explains the relationship between the user and the register they used.

Example of the register found in this study is "get the green stuff." The second problem is interpreting the meaning of the register. In how to analyze the meaning, the context must be identified first. The context here is the sailors loading up the stuff to the ship. When the order has spoken, one of them starts to picking up the vegetables. Then, "green stuff" here means "vegetables". Overall, the meaning of the register is "loads the vegetables". The third problem is the relation among the register, speaker, and the hearer. The speaker is the man who use the register as a command, the register used as a request or an order, and the hearer become the doer or the one who taking the action as the response to the intended order.

ABSTRAK

Suhermanto, Ma'ruf. (2018). Register Used By The Main Character of

The Movie "In The Heart Of The Sea". English Department, Faculty of Arts and Humanities. The State Islamic University of Sunan Ampel Surabaya.

Thesis Advisor : Dr. A. Dzo'ul Milal, M.Pd.

Key Words : Register, Field, Tenor, Mode.

Penelitian ini menginvestigasi penggunan *register* oleh karakter di dalam film berjudul "In the Heart of The Sea (2015)". Penulis menemukan banyak bentuk *register* dari kelas katanya sampai penggunaan *register* itu sendiri dalam aktivitas sehari-hari mereka. Banyak istilah yang terdiri dari satu atau dua kata yang biasa digunakan untuk menunjukkan ciri khas seorang pelaut. Arti beragam dari sebuah *register* dan hubungan antara pengguna dan *register* itu sendiri merupakan point yang sangat menarik untuk dianalisa.

Penelitian ini menggunakan metode kualitatif-deskriptif, penulis mengambil naskah asli dari film yang berbentuk transkrip. Kemudian penulis memberi tanda warna pada *register* yang telah di identifikasi sekaligus memberi keterangan tentang siapa yang mengutarakan *register* tersebut. Penulis mengumpulkan *register* yang telah di identifikasi ke dalam tabel dan dilengkapi keterangan pembicara, *register*, dan artinya. Ada dua langkah untuk menganalisa data: Pertama, penulis menganalisa arti dari sebuah *register* menggunakan teori milik Halliday termasuk *field*, *tenor*, dan *mode*. Kedua, penulis menjelaskan hubungan antara pengguna dan *register* yang mereka gunakan.

Contoh register yang telah teridentifikasi adalah "get the green stuff". Masalah kedua adalah menginterpretasikan arti dari register. Untuk menganalisa arti dari register tersebut, konteks harus diketahui terlebih dahulu. Konteksnya disini adalah para awak kapal sedang menaikkan barang bawaan mereka keatas kapal. Ketika perintah diberikan, salah satu dari mereka dengan sigap segera menaikkan sayur-sayuran. Maka dari itu, "green stuff" mempunyai arti "sayuran". Secara keseluruhan arti dari register tersebut adalah "angkat sayurannya keatas". Masalah ketiga adalah hubungan antara pembicara, register yang digunakan, dan pendengar. Pembicaranya merupakan orang yang memerintah diatas kapal, register merupakan atau berperan sebagai kalimat perintah, dan pendengar adalah orang yang melakukan sesuatu sebagai respon atas perintah yang diutarakan.

CHAPTER 1

INTRODUCTION

This chapter elaborated all aspects related to the research and also important as the preface or introduction to the writer's analysis. It contains background of the study, research problem, research objectives, significance of the study, scope and limitations, andthedefinition of key terms.

1.1 Background of the study

In the Heart of the Sea is the movie created by Charles Leavitt and Rick Jaffa & Amanda Silver in (2015) adapted by novel titled "In the Heart of the Sea: the tragedy of the whaleship Essex" by Nathaniel Philbrick. This movie provided a story about the germinal of Herman Melville's work, known as Moby Dick. This movie is the story of a crew of whaleship Essex and its captain, Captain George Pollard. In this movie, Owen Chase as the main character is the chief of the one of canoe used to hunting a whale which consist of several person. Owen Chase has a responsibility to lead his crew in a mission to chase a whale. Actually Captain George Pollard is the one who stand above them all, if Owen has a responsibility to give his best to the crew by catch the whale as much as they can, Captain George Pollard has a responsibility to guide the crew and give them a guarantee for their safe.

Every movie used a conversation as the media to make the viewer understand about the situations that happened inside the movie. Conversation among the

characters can be interpreted normally or it may have an implicit meaning that need a different interpretation to get the meaning. Basically, a person held a conversation to gain an information. But another functions of conversation can be used as purposes, not only to gaining information. It can be purposed to ordering and requesting. This movie have a lots of conversation, mostly about giving an order and receiving commands.

Conversation needs a tool, it is language. According to Sapir Edward (1921) "language is a purely human non-instinctive method of communicating ideas, emotions and desires by means of a system of voluntary produces symbols." From his statement. Language not only used for communicating, but also used to give expression. In other word, language can applied into different purpose. Language is the best and essential part in how to hold the conversation. Language also has many forms, including "special terms".

In social aspect. Language is a part of human life. They use language to create a relationship among the people. They speak from one person to other, then from groups to other groups, until they decide to make a language to become their identity. Then, other group also create their own language. This kind of relationship creates a situation that is recognized as dissimilarity. Because not the whole world used a same language, they use different language to show who they are. They usually use "special terms" inside their own group. As the researcher stated in the previous paragraph. They use it as the way to show their identity to the others.

In the differences among the languages, there are also some different type of language used inside a language. For example a person which uses a same language with the other people makes a different word to interact with others, then it is influenced to the other people, until they used that language in certain purpose. It is recognized as the part of sociolinguistics. As stated by Holmes (1992: 1) "sociolinguistics is the study of the relationship between language and society." And Wardhaugh (2006: 119) "sociolinguistics is the study of language use within or among groups of speakers". From those statement, language is one of the vital parts in human life. Language give an understanding among the people and give a value for each of them.

Based on Holmes (2013: 262) "the term 'register' here describes the language of groups of people with common interests or jobs, or the language used in situations associated with such groups." And Wardhaugh (2006: 52) "registers are sets of language items associated with discrete occupational or social groups. Surgeons, airline pilots, bank managers, sales clerks, jazz fans, and pimps employ different registers." According to the statement, register is a certain statement which used by certain people in a group. A person which used register usually have a certain job. For example he is a pilot, he will use any kind of statement that related to his job to communicate with his friend in the same field to show his identity.

The researcher has analyzed the movie that give the viewer a language which used by the people inside it. The characters had unique job fields, the whale-hunter. The title is "In the Heart of the Sea", a story of the whale-hunter. They collecting the

whale-oil which earned from the living whale day by day until they meet the most dangerous creatures in the world, recognized as the sperm-whale. Their captain sunk in his own ambition and pursued that whale. From their beginning until their climax situation, there are many registers stated not only from the captain, but also his crew.

A different position makes them used a limited kind of register, from the captain which used a kind of register which showed his authority until the crew that only used a kind of register that never used by their captain. As stated by Wardhaugh (2006: 52) "each register helps you to express your identity at a specific time or place, i.e., how you seek to present yourself to others." Here, this situation proved that the different role or status in the structure in different occupational culture also give a different impact to the kind of register they used. This condition will showed the status of each person in a group, and this kind of behavior has analyzed by the researcher to give the clear explanation towards the situation happened in the dissimilarity of register which used also by the different position in the crew of whale-hunter inside the movie.

In how to give shape to this thesis. The researcher used the basic theory of sociolinguistics from Janet Holmes and Ronald Wardhaugh. Also the register theory from M.A.K Halliday to help the researcher find the correct way in how to analyze the register meaning based on the situation.

The researcher interested in analyzing this topic because the uniqueness of the register itself. For some people, register may recognized as the strange words that never heard by them before. But for some groups that elevated their mind concept

through this system and habitually used register as the codes to keep their group's privacy from the people outboard their cluster, register is just like their own identity. The researcher hope another linguistics learners understand about the meaning and concept of register and how to practice it.

1.2 Statement of Problems

There are various position or rank in their occupation as the whale hunter, in the heart of the sea is a movie which give the viewer a perspective of the sea-man which play role as the hunter of whales. Of course, they used different register depends on their position. From that statement, there are several problems that has already identified by the writer:

- What are the registers used by the characters?
- What is the meaning of registerused by the characters?
- What is the relation between the character's position and the registers they used?

1.3 Objectives of the study

Based on the problems stated above, the results that considered as the aim of this research are:

- To mention the register used by the character inside the movie.
- To interpret the purposes of register used by the character inside the movie
- To explain the relationship between the character's role position and the register they used.

5

1.4 Significance of the study

This research give the reader a perspective of several groups that may exist in the world, but in small scale. Register is the object of this research, and the whale-hunter are the doer. This study gives contributions in theoretical and also practical matters. Theoretically, this research can be used as the references for anyone who studied about special terms and its meaning that zipped as the register. This kind of matters also give contribution to sociolinguistics and pragmatics fields, especially in analyzing terms. Practically, this study is very useful for the readers that want to practice the register that has already analyzed to the group they created.

1.5 Scope and Limitation

This research focused on the use of the register, it's meaning, and the relation between the register and occupation level. Following the previous statement, the scope of the researcher in this research is all of the register used by the group of whale-hunter leaded by Captain George Pollard in the movie, including the relations between the word, the meaning, and the situation. The limitation for this research is the range of the object, because the researcher only analyzed the register used by a group that is George Pollard group. The people excluding it is uncounted.

1.6 Definition of Key Terms

In how to avoids misunderstanding through this thesis, the researcher give some key-terms and it's meaning as the purpose to make the reader easier to understand.

- Register is the kinds of language used in certain group, usually in occupational fields and used as the identity for them as the way to show anyone that they are the part of those groups.
- 2. In the Heart of the Sea is the title of a movie telling about the whale men's voyage to the farthest place and facing their mightiest enemy that is the white whale.
- 3. Field is the situation when the register has already said, because the situation happened will influence the meaning at all cost.
- 4. Tenor is the speaker or anyone who said the register in certain situation.
- 5. Mode is the type of uttered text. Based on the speaker's role and the situation, mode gives real sense to the register utterance.

CHAPTER II

REWIEW OF RELATED LITERATURE

This chapter elaborated any of related study both from linguistics and literature field as the source and reference for this research. Some of the theories are sociolinguistics, language variety, and register. Those theories explained below as the understanding tools for the readers to this analysis.

2.1 Sociolinguistics

Language and society cannot be separated. In our life, language is important tool to make anybody near us understand about anything we purposed. It's impossible to make anyone around us understand without language, both oral language and body language. As stated by Wardhaugh (2006:1) a *language* is what the members of a particular society speak. That means one of the important element of good communication in society is language. We cannot deny that both of those elements (language and society) are the important aspect in our life. Holmes also stated (2013:1) sociolinguists study the relationship between language and society. They are interested in explaining why we speak differently in different social contexts, and they are concerned with identifying the social functions of language and the ways it is used to convey social meaning. That statement means the use of different languages in any places with different society.

Another statement come from Miriam (2006:1) sociolinguistics is a very broad field, and it can be used to describe many different ways of studying

language. The meaning of that statement is sociolinguistics is very wide field, many sociolinguists give lots of descriptions of sociolinguistics in several models. But the core of all those statements is language cannot run without society, and vice versa.

Talking about sociolinguistics, is there any differences between sociolinguistics and linguistics? Actually, there are no significant differences between them. Both of them use language as the main media. Stated by Wardhaugh (2006:1) when two or more people communicate with each other in speech, it called the system of communication that they employ a code. In most cases that code will be something called a language. From that statement, language is an important tool for human communication. Communication formed the society and society decided what kind of language used. In short explanation, linguistics emphasizes on the description of the formal elements of language, and their combinations which constitute the "code" known and employed by members of a speech community. On the other hand, sociolinguistics emphasizes on variations in the form of the code according to such widely recognized sociological categories as age, sex, ethnicity, and socioeconomic class, and the uses of that code in accomplishing the everyday affairs of the community (Machan and Scott, 1992: 8).

By elaboration above, sociolinguistics is the branch of linguistics that combined all aspects of language with social system and created relations among the user, society, and the variation of language. Based on the theory, sociolinguistics divided into two kinds, there are macro-sociolinguistics and

micro-sociolinguistics, stated by Trudgill (1974: 51) macro-sociolinguistics refers to sociolinguistic areas involving the study of relativity large groups of speakers. whereas micro-sociolinguistics is a term used to cover the study of face to face interaction, discourse analysis, conversational analysis and other areas of sociolinguistics involving the study of relatively small groups of speakers. Macrosociolinguistics is concerned with the study of language history and development in the scope of society in general. Language planning and language standardization are the examples of this study. Meanwhile, micro sociolinguistics is concerned with study of language in specific speech community with the scope of discussion such as behavior toward language, style of speech, domains of language use, register, speech act, etc. The first concentrates on the role of language in society which analysis communal behavior as a unit, while the other concentrates on the individual behavior. From that statement, this research is focused on the relationship between the language user and their society in a group that is whale-man group. It is clear that the researcher used micro-sociolinguistics in this research

2.2 Language Variety

Sociolinguistics comes along with several elements inside it, but the most important study to complete this research resources are language variety, pragmatics theory, speaking theory, and the register theory. First of all, in this sub chapter the researcher elaborate the meaning of language variety.

Stated by Wardhaugh (2006:5) variation implies that a language is not just some kind of abstract object of study. It is also something that people use.

Wardhaugh statement is clear. A variation means the kinds, the models, the types. People not only use one language in their social living, more then it, they have used a lot of language types from oral language, sign language, body language, and many more.

From lots of language variation, dialect is the main factor give a language different shape. Wardhaugh stated (2006: 135) just as a regional dialect marks off the residents of one region from those of other regions, a social dialect would be a variety associated with a specific social class or group, marking that class or group off from other classes or groups. That explanation give this research a clear aim for what the researcher have to done. As the variation, regional refers to the place or where the language has used. On the other hand, social refers to the specific groups and community that practicing their own language type.

Along with Wardhaugh, Holmes also described language variation into two kinds: (Focus on users) and (Focus on uses). Holmes stated (2013: 131) people often use a language to signal their membership of particular groups and to construct different aspects of their social identity. Social status, gender, age, ethnicity and the kinds of social networks that people belong to turn out to be important dimensions of identity in many communities. That explanation shows the variety of the user personalization based on both place and social condition.

Second, language variation: focus on uses explained by Holmes (2013: 239) language varies according to its uses as well as its users, according to where it is used and to whom, as well as according to who is using it. The addressees and the context affect our choice of code or variety, whether language, dialect or style.

Little bit different with the "users". "language uses" is more about the word choices along with the style and its dialect. Based on the last explanation elaborated by Holmes, the researcher also stated another following theory such as dialect, style, context pragmatics, and register below.

2.2.1 Dialect

From lots of language variation, dialect is the main factor of language different shape. Wardhaugh stated (2006: 135) just as a regional dialect marks off the residents of one region from those of other regions, a social dialect would be a variety associated with a specific social class or group, marking that class or group off from other classes or groups. That explanation give this research a clear aim for what the researcher have to done. As the variation, regional refers to the place or where the language has used. On the other hand, social refers to the specific groups and community that practicing their own language type.

Explained by Holmes (2013: 140) dialects are linguistic varieties which are distinguishable by their vocabulary, grammar and pronunciation; the speech of people from different social, as well as regional, groups may differ in these ways. Also Wardhaugh (2006: 28) dialect is used both for local varieties of English, e.g., Yorkshire dialect, and for various types of informal, lower-class, or rural speech. 'In general usage it therefore remains quite undefined whether such dialects are part of the "language" or not. In fact, the dialect is often thought of as standing outside the language. . . . As a social norm, then, a dialect is a language that is excluded from polite society'. Then, dialect itself can be excluded from language

part but still be the factor of language variation. Based on those two references, dialect divided into two kinds, there are regional dialect and social dialect.

Regional dialect related to the place and the location of dialect utilization. Holmes (2013: 156) regional dialects involve features of pronunciation, vocabulary and grammar which differ according to the geographical area the speakers come from. Straight with Holmes elaboration, Wardhaugh stated (2006: 44) there may even be very distinctive local colorings in the language from one to another location. Such distinctive varieties are usually called regional dialects of the language. From Regional dialect, the hearer will learn how to distinguish among the language and its location.

Alongside with regional dialect, social dialect related to the society or the people. Wardhaugh stated (2006: 49) social dialects originate among social groups and are related to a variety of factors, the principal ones apparently being social class, religion, and ethnicity. Holmes also stated (2013: 156) social dialects are distinguished by features of pronunciation, vocabulary and grammar according to the social group of the speakers. Social group is usually evaluated on the basis of a range of features, such as education, occupation, residential area and income level.

2.2.2 Style

Every language has style. Stated by Wardhaugh (2013: 116) style is how people choose to code what they want to say on a particular occasion. And Holmes (2013: 267) people's styles of speech and written communication index not only aspects of their identity such as their ethnicity, age, gender and social

background, they also indicate the contexts in which language is being used. Style of language determined by lots of the user's factors and make language has its own type. It is clear that the kind of language style determined by identifying the user's characteristic.

2.2.3 Context

In how to reveal the real meaning of words in their daily conversation, people usually relate the text with its context. Then what is the context? Holmes stated (2013: 365) context is clearly crucial in interpreting what is meant, and pragmatics extends the analysis of meaning beyond grammar and word meaning to the relationship between the participants and the background knowledge they bring to a situation. In brief explanation, context is anything supports the main text. Both in written and speech forms, context hold the important role to make the opposite easier to understanding our purpose.

2.3 Register

Language contains variation, style, and context. People usually use normal conversation with normal words, the words that other people easy to understand. But some of words in the world had a unique characteristic, only certain people understand it. This word is called register. Stated by Satriaki (2015: 30) the term register refers to linguistic variation in terms of context which may be unique to a single speaker. Wardhaugh also stated (2006: 52) registers are sets of language items associated with discrete occupational or social groups. Surgeons, airline

pilots, bank managers, sales clerks, jazz fans, and pimps employ different registers.

The main understanding of register has elaborated by Halliday. Based on his statement, register is a semantic phenomenon in the sense that 'register is the clustering of semantic features according to situation type' (Halliday, 1978: 68, 111, 123) the semantic stratum is, for Halliday, where language interfaces with the eco-social environment. At this interface, register is 'the necessary mediating concept that enables us to establish the continuity between a text and its sociosemiotic environment' (Halliday, 2002 [1977]: 58; see Bowcher, forthcoming) in short explanation, register is the word that connecting people and their occupation field. Only people who know well about their job environment condition can use this kind of language variety.

In order to strengthen Halliday's register thory, there is some elaboration of register itself. Kocak stated (2013: 36) the term register is used as a cover term for varieties defined by their situational characteristics. As same as Paolillo's statement (1999: 4) the term register used to denote a dimension of language variation that is orthogonal to dialect, genre, text type, modality and discourse topic. All those elaborations shows the characteristic of register as the situational words that uttered in different way and only people who related with certain occupation will understand the purpose.

Register has three main components. It is elaborated by Halliday (2004: 34) the combinations of field, tenor and mode values determine different uses of language – the different meanings that are at risk in a given type of situation. It

means that each factor give a huge contribution in register's true meaning. Further explanation elaborated below.

2.3.1 Field

Halliday stated (2004: 33) field – what's going on in the situation: (i) the nature of the social and semiotic activity; and (ii) the domain of experience this activity relates to (the 'subject matter' or 'topic'). Two main points about Field of Register has already explained by Halliday. In other words, field is the situation when the Register has already said, because the situation happened will influence the meaning at all cost. The meaning of the register will changed if the field and the word is not synchronized.

2.3.2 **Tenor**

In describing Tenor, the researcher took another Halliday's explanation. Halliday stated (2004: 33) tenor – who is taking part in the situation: (i) the roles played by those taking part in the socio-semiotic activity – (1) institutional roles, (2) status roles (power, either equal or unequal), (3) contact roles (familiarity, ranging from strangers to intimates) and (4) sociometric roles (affect, either neutral or charged, positively or negatively); and (ii) the values that the interactants imbue the domain with (either neutral or loaded, positively or negatively). Based on the explanation, tenor is the speaker or anyone who said the register in certain situation. The combination between the speaker's role and the situation will make a perfect sense toward the register utilization.

2.3.3 Mode

Last component of register is mode. Halliday said (2004: 33, 34) mode — what role is being played by language and other semiotic systems in the situation: (i) the division of labour between semiotic activities and social ones (ranging from semiotic activities as constitutive of the situation to semiotic activities as facilitating); (ii) the division of labour between linguistic activities and other semiotic activities; (iii) rhetorical mode: the orientation of the text towards field (e.g. informative, didactic, explanatory, explicatory) or tenor (e.g. persuasive, exhortatory, hortatory, polemic); (iv) turn: dialogic or monologic; (v) medium: written or spoken; (vi) channel: phonic or graphic. Halliday has already give a clear elaboration about mode. It is the type of uttered text. Based on the speaker's role and the situation, mode gives real sense to the register utterance.

These three register variables are used to explain people's intuitive understanding that individuals use different resources, different kinds and different parts from the system of language (Matthiessen & Halliday 1997) the statement is clear, when one of those three variables is different with anything speaker purposed, then the meaning also changed and misinterpreted by the interlocutors.

The indicator of register depends on the language. Stated by Almurashi (2016: 4) inside the language itself, the SFL describes a model with three levels as a tristratal model of language as mentioned in Table 1. They are as follows:

- 1. *Discourse-Semantics* has three metafunctions. They are: interpersonal metafunctions, ideational metafunctions, and textual metafunctions.
- 2. *Lexico-grammar* includes both grammar and vocabulary in one stratum and represents the view of language in both lexis and grammar.

3. *Phonology, orthography (or graphology*) which refers to the sound system, the writing system, and the wording system.

CHAPTER III

RESEARCH METHOD

This chapter elaborates the research design and the data collection method. The researcher has already mentioned five main subs for this section including research design, data, data source, research instruments, technique of data collection, and data analysis.

3.1 Research Design

Firstly, there is a description of research design or research procedures. There are two of them, quantitative and qualitative, stated by Coulmas (1998: 102) quantitative studies tend to simplify many phenomena; qualitative analyses, on the other hand, often rely on samples which are too small to draw general conclusions. There are differences between the method of quantitative and qualitative that is how the researcher got the data. Based on Coulmas (1998: 182; Dorian: 1981; Schmidt, 1985) in such a situation, there is enough of a population of fluent elder speakers, fluent younger speakers and semi-speakers to be able to turn to quantitative methodologies, based on the collection of data through surveys and questionnaires. This is clear that quantitative is a method that getting the data through collectively ways and formed as numerical data.

Different with quantitative, qualitative is a method using descriptive explanation. This method used by the researcher to elaborate the data. As stated by Coulmas (1998: 176) qualitative studies require sensitivity to the particular relation of the last speakers towards their stigmatized obsolescent language. In

addition, fieldwork on obsolescent languages raises all the questions of ethics inherent to research on marginalized and dominated populations, issues which are best addressed before and monitored during the time of fieldwork. Another statement is from Mallinson, Childs, and Herk (2013: 13) in qualitative sociolinguistic research, the social system is moved toward a more central position, and the relationship between linguistic variation and identity is prominent. Here the researcher used qualitative method to analyze the data focused on register that has already influenced by the social context around it.

3.2 Data and Data Source

The researcher used all elements from the movie of "In the Heart of the Sea" including the scenes, the dialogue, and the transcript as the data source for this research. The data itself, formed as the registers uttered by the main characters inside the movie. Register used by the characters contains a lot of meaning depend on the situation.

3.3 Research Instrument

The main instrument for this research is the researcher himself as the data collector, the data analyzer and conclusion maker. Alongside with the researcher as the main instrument, there are some supporting instrument such as media to help the researcher like a laptop and anything inside it including the software to play the main source formed as video, type the text, open the dictionary, show the transcript, and providing the references. Smartphone and internet data used as the supporting instrument to search the previous research and references. Speaker also

became the supporting media to providing a clear sound from the movie. The last is flash-drive, used as the supporting media to move the data to other gadget and became the mediator to print the thesis out on another place.

3.4 Technique of Data Collection

In how to collect the data, the researcher gave marks to any register uttered by the main character that has already became the member of whaling group. Because the data source formed as the movie and followed by transcript, the researcher gave the short dialogue while the register uttered and type down the situation happened in the movie above. The researcher gave the current marks to the register uttered. To elaborate the technique, the researcher elaborated the steps of collecting the data below:

- 1. The researcher watched the movie and only took the part when the main characters started their voyage to the sea until they not using register anymore.
- 2. The researcher took the register and separated them based on their user and interpretation on the table.

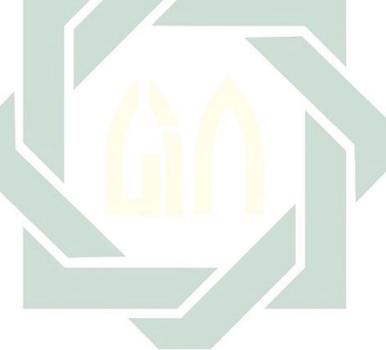

3.5 Data Analysis

In how to analyze the data, the researcher gave an example of register uttered by one of the whaling-crew member. There are following steps to show the data's analyzing:

1. The researcher interpreted the register based on Haliday's register theory.

- 2. The researcher explained the register completed with the speaker, condition, situation, relation among the register, user, and the hearer, anm interpretation for each term.
- 3. The researcher created the table about the total and percentage of the analyzed register.
- 4. The researcher wrote the discussion session.

CHAPTER IV

FINDING AND DISCUSSION

In this chapter, the researcher has analyzed the data using the theory of register based on Halliday. The researcher has already classifying the registers based on its class. Next, the researcher gives the meaning and the relationship between the users and the registers as the way to answer the problems. The discussion has putted on the last of this chapter

4.1 Findings

In order to answer the question, the researcher has collected and classified the registers used by the main characters. The first problem is the register. The researcher has classified the register based on its word class to make the reader easier to differentiate them.

This section separated as same as the amount of the register classes stated above. The researcher has analyzed the meaning of each register using his own interpretation based on Halliday's theory including field, tenor and mode, completed by the context that really happened inside the movie. Based on the meaning of the registers itself, the researcher also elaborated the relation between the speaker's class position and the register they used.

4.1.1 Table of Register

Table 4.1.1

The User	Register	Meaning		
The Owner of the Whaling Ship Company	1. The Essex	- The ship called The Essex		
	2. Blood	- Caste in society		
	3. Scion of a great whaling family.	- The descendant of the famous great whaling family		
	4. Our patron.	- Our protector		
The Captain	1. Right or sperm	- Right whales or sperm whales.		
Captain	2. Set stunsails.	- Release all main and extra sail.		
	3. Shorten sail, mr. Chase!	- Roll up the sail sheets.		
	4. Veer off, mr. Lawrence.	- Move, mr. Lawrence.		
	5. Blister your goddamn lungs!	- Scream loudly!		
	6. The locals told me your voyage was way laid, sir.	- People here told me your voyage has messed up, sir.		
	7. Mr. Chase! Hoist and swing boats	- Get down the whale boats.		
	8. If we set sail now, catch the south easterlies at their best time and fill our belly, we could be home in six months.	- If we complete all of our necessary and take the best time for the easterly wind to moving us as fast as possible, we could be home in six months.		
	9. If it weren't for that demon, a whale, white as alabaster, hundred feet long, sent six of my crew to their graves.	- If it were not for that beast, a whale, white as alabaster, hundred feet long, killed my six men.		
	10. If we make Cape Verdes.	- if we come to Cape Verdes on time.		
The Mates	1. Ladies	- Crew's position that placed lower		

(Including the first and second Mate)		than the captain and mates	
	2. Greenhorn.	- Non-experienced young man on the ship.	
	3. Blows!	- Sign of the appearance of whales	
	4. Bunks	- Bed.	
	5. Dogwatch!	- Pay attention	
	6. As first mate.	- First vice captain.	
	7. A one-fifteenth lay.	- A single payment that fifteen times higher than another.	
	8. A sorrier pack of deck wallopers	- List of the empty barrels	
	9. Second mate's harpooner.	- The lance thrower on the second mate's boat.	
	10. Fifty.	- A whale contains around fifty barrels of oil.	
	11. The Offsh <mark>ore</mark> Grounds.	- The furthest spot from any lands.	
	12. On deck.	- on the deck.	
	13. A thousand leagues along the equator.	- The furthest spot along the equator.	
	14. A squall on the starboard bow.	- The upcoming wave from the storm on the right side of the ship.	
	15. It's the gasket	- It's the rope.	
	16. You're captain's harpooner	- The lance thrower on the captain's boat.	
	17. Ain't no greenhorns no more	- We are not beginner anymore.	
	18. Get the green stuff	- Loads the vegetables.	
	19. Haul short the anchor.	- Pull the anchor up.	
	20. Yank to the wind!	- Let the ship move by the wind strike the sail sheets.	
	21. Take the helm.	- Get the ship's steering wheel.	

\sim	•			• •	
')')	Λ	/I വ	$r\Delta$	sai	
44.	- 11	па	\mathbf{r}	Sai	Ι.

- 23. Let fall clews and bunts and sheet ho!
- 24. Set topsails and topgallants.
- 25. The fewer questions one asks is better.
- 26. Heave away on the windlass.
- 27. Crank away on the windlass!
- 28. Set topgallants.
- 29. Make sail
- 30. Let fall your course!
- 31. Getting this slop on the first day?
- 32. Main topsail leech lines!
- 33. Harpooner, make ready to boat!
- 34. Go main topsail leech lines.
- 35. Too slow, you damn coofs!
- 36. Sweat that line, Barz.
- 37. Forecourse bunts!
- 38. Put them over the ground tier casks.
- 39. There's a snarl in the gasket, sir.
- 40. Anchor's trim!
- 41. First drills are tomorrow.
- 42. Six bells sharp.

- Develop the sail sheets.
- Open all the sail sheets.
- Set the most top sail sheet and the main top sail sheets.
- Better ask no question.
- Push away the windlass stronger.
- Crank away on the pulley.
- Set the main top sail sheet.
- Release the sail sheet.
- Cut the jammed tie.
- Enjoy the dinner on the first day?
- The most top sail sheet has jammed by the wet rope.
- The Lancer, prepare for hunting!
- Go to that jammed rope.
- Too slow, hurry up, men.
- Make the rope wet, Barz.
- Go to the front sails.
- Put them over the list of that barrels.
- There is a problem that makes the rope jammed, sir.
- Pull up the anchor.
- First training is tomorrow.
- At six o'clock.

43. We're headed into a squal	ed into a squall.	into	headed	We're	43.
-------------------------------	-------------------	------	--------	-------	-----

- 44. We're nearing the Gulf Stream
- 45. You're on your first Nantucket sleigh ride, boy.
- 46. Fields of flukes far as the eye can see.
- 47. Sea's coming aboard!
- 48. Beach us on her!
- 49. Look for braces, lads.
- 50. Trim for speed.
- 51. Set fore the main topsail and topgallant stunsails, men.
- 52. Make fast your stunsail halyard.
- 53. Bracing fore topsail, sir.
- 54. Hold our course.
- 55. Double gripes on the boats!
- 56. Go lee!
- 57. Hold steady lines!
- 58. Turn to leeward!
- 59. Strike topgallants.
- 60. Let fly sheets!
- 61. We'll be broadsided!
- 62. Strike those damn topgallants!
- 63. Topgallants away!

- We're headed into the storm.
- We are approaching the storm vortex.
- You are on your first Nantucket whale chasing, boy.
- A place that only lucks there.
- A huge wave is coming.
- Bring us to the whale.
- Look for the rolled sail sheets.
- Make the ship move faster.
- Set all the extra rolled sail sheets.
- Set the stunsail located on the backside quickly.
- Release the front topsail.
- Hold the steer.
- Strong gripes on the boats with both of your hands.
- Look for the low place to take cover).
- Hold on the strongest rope.
- Turn the ship to avoid the wave.
- Cut down the topgallant sail sheets.
- Cut down the sail sheets.
- We will tumbling.
- Cut those topgallants quickly.
- Topgallants getting loose.

- 64. We have to get her upright!
- 65. There she blows!
- 66. All hands! All hands on deck!
- 67. Away the boats.
- 68. Lower away!
- 69. Straight! Crack them backbones.
- 70. There they breach!
- 71. Spring those oars till your arms fall off.
- 72. Chimney's afire!
- 73. Peak oars!
- 74. Dead ahead, Peterson!
- 75. Back the foreyard lower the tackle!
- 76. Mr. Lawrence, take us leeward.
- 77. Head us straight for the school.
- 78. Stand by the spanker.
- 79. The Essex! she's listing.
- 80. Make haste, boys!
- 81. Nickerson, there are more casks in steerage.
- 82. Hardtack is dry.
- 83. Mr. Lawrence, take the wheel.
- 84. Stunsail boom
- 85. We'll skirt the edge of it.

- We have to make the ship upright.
- There the whales blows.
- Everybody on deck.
- Release all the boats.
- Relegated all the boats.
- Go straight! get those whales.
- There they moving inattentively.
- Paddle those oars tirelessly.
- The whale is dying.
- Paddling strongly.
- Thrust the whale's face, Peterson.
- To the front side relegate the pulley.
- Mr. Lawrence, take us to the safe place.
- Bring us the tools.
- on the backside of the ship.
- The Essex, it is leaning.
- Hurry up, boys!.
- Nickerson, there are more barrels on deck.
- The biscuits is safe.
- Mr. Lawrence, take the steer wheel.
- Stunsail is ready.
- We will move faster.

	86. And any man who is idle will find himself swimming home	- And any lazy man will going home by their own way.
	87. Blood is not gonna fill a ship with oil	- Experience is worthier than society status.
	88. Don't tell me Matthew Joy's put down the bottle.	- I do not believe you will stop drunk.
	89. We're boat to black skin.	- let's go to that whale.
	90. We must shorten sail immediately	- We must tie up the sail sheets immediately.
	91. The devil take the mexican grounds!	- The whale men found what they seeking for.
	92. Did he dance a jig and pick your pocket as well?	- Did the whale messed it up and took all of your precious things?
	93. Set your fore staysail and your fore and main topsails.	- Set the extra sheets of the main sail sheet and the extra sheets of the topsail sheet and the topsail sheet itself.
	94. Let go clew lines and sheet ho!	- Roll the ropes and release the sail sheets).
	95. We must fall off and run with it.	- We must follow the weather by cut all the sail sheets and do not against with it.
	96. Climb to weather and grab the shrouds.	- Climb to the top and grab the sail sheets.
	97. We'll have to strip her of her sails and jimmy-rig something.	- We have to repair the broken part of the ship and give me all the tools to repair it.
	98. If we don't shorten sail and bear off, it'll catch us on the beam.	- If we do not shorten the sail sheets and follow the waves, we will crashed by the waves itself.
Crew	1. Aye, sir.	- Yes, sir.
	2. Landsman.	- people usually work on soil area

3.	Portside

- 4. Port bow!
- 5. The flukes!
- 6. Whale pins
- 7. Forty-barreler?
- 8. Nantucket whale oil.
- 9. Twenty fathoms,
- 10. Windlass is ready and sails are loose
- 11. She may be old but she can still roll, boys
- 12. East of Halifax, sir.
- 13. We're down to 60 fathoms of line left, sir!
- 14. How many fathoms can he go?
- 15. Down to 50 fathoms, sir.
- 16. she'll take us down with her.
- 17. That's a calf.
- 18. That's the cow.
- 19. And that's our boy!
- 20. That's the money.
- 21. Oh, he's a buster!
- 22. Eighty fathoms of line left,
- 23. 70 fathoms left, sir.

- The side part of the ship
- The front part of the ship
- A profitably moment
- A pins made from the whale tooth.
- A whale contains around forty barrels of oil.
- Whale oil produced by Nantucket.
- Twenty rolls of rope.
- The pulley is ready and the sail sheets is released.
- This ship may be old but it still tough, boys.
- Halifax, one of city on Canada.
- We only have sixty rolls of rope left.
- How many deeps can he dive?
- Only fifty rolls of rope left.
- We will sinking down with the ship.
- That is the small sized whale.
- That is the medium sized whale.
- And that's our target.
- That is a wealthy and expensive
- kind of whale.
- A high quality whale.
- Eighty rolls of rope left, sir!
- Seventy rolls of rope.

24. 30 fathoms left, mr. Joy.
....Ten fathoms left, sir!
25. A whale, sir. It stove the ship.
26. Ain't no skinny hog worth more than that
27. I see some white water.
- Thirty and ten rolls of rope.
- A whale has burned the ship, sir.
- The offer is too demanding.
- I see the sign of lot of whales.

4.1.2 Noun

1. Blood (Noun)

Meaning: Caste in society

The speaker uses the register as the consideration of the hearer status and the hearer understands it as clarification.

Owen Chase disagree with the ship owner decision to make him a first mate on their ship but mr. Mason convincing Owen that he cannot be a captain not because he did not have enough experience and respect among the men of the ship. Owen Chase cannot be a captain because his caste in society, his blood class is lower than a man had chosen by the ship owner.

2. Ladies (Noun)

Meaning: Crew's position that placed lower than the captain and mates

The speaker usess the register as the consideration of the hearer position on
the ship and the hearer understands it as clarification.

When Owen comes to the ship's kitchen and meet the crew, Owen gives orders to them and called them ladies, it is normal for a sailor to called his subordinate "Ladies" in order to show them their position on the ship.

3. Greenhorn. (Noun)

Meaning: Non-experienced young man on the ship.

The speaker uses the register as the consideration of the hearer status and the hearer understands it as clarification.

Owen called Tom Nickerson a "Greenhorn" when he talks to Tom for the first time. That register represented Tom as the youngest man on the ship.

Even for the ordinary crew, their age average is around twenty up to forty, but

Tom and his friend Barzillai is just a teenagers without experience, the register

is same like a soft horn with green color that may broke anytime. It shows

them that Owen is a huge-experienced person and became their role model.

4. Blows! (Noun)

Meaning: Sign of the appearance of whales

The speaker use the register as the information to the hearer and the hearer

understands it.

A code from anyone who seen the appearance of the whale. When there

are whales far from the ship from a current position, anyone who seen it must

yelling this register. In that moment, Owen Chase himself as the first mate

shouts loudly to give his men the main order, to prepare anything necessary to

hunting the whale.

5. Bunks (Noun)

Meaning: Bed.

The speaker use the register as the information of things and the hearer

understands it.

A simple word for the sailors to called their bed. Stated by Owen when he

trains the new men anything about sailing and hunting the whales.

6. Aye, sir. (Noun)

Meaning: Yes

The speaker uses the register as the answer for the order they achieve and the

hearer understandss it as response.

There are other around twenty or more registers with the same meaning with this one, mostly formed as same as this register too. The meaning of this register is "yes". This is a special terms for any sailor when they want to say "yes" to their superior as the response for the orders given to them. It is clear that there are three kinds of relation between register and its user based on the position on the ship, the men to their mates, the men to their captain, and the mates to their captain

7. Landsman. (Noun)

Meaning: people usually work on soil area

The speaker uses the register as the consideration of the interlocutor status.

This is how the man has providence to live on the sea and make dependent occupation on it (seaman) they differentiating their position with the others that destined as the man who lives and usually work on the land (landsman).

8. Dogwatch! (Noun)

Meaning: Pay Attention

The speaker uses the register as the command for the hearer and the hearer understands it as an order and the hearer takes an action to do the intended purpose of the register.

Owen as the first mate said this register to his men loudly and distinctly to make the crew pay attention to him. This kind of word is representing the behavior of dog when it got a command from its owner.

4.1.3 Preposition

1. Portside! (Preposition)

Meaning: The side part of the ship

The speaker use the register as the information of place to the hearer and the

hearer understands it.

This kind of register used to give the directions to the captain or mates that

asking the position of something that only a person in the most top of the ship

that know it. These words has shouted by Barzillai when Owen Chase asking

to him about the position of the accurate position to catch the whales.

2. Port bow! (Preposition)

Meaning: The front part of the ship

The speaker uses the register as the information of place to the hearer and the

hearer understands it.

The function of this register is same as "Portside", the only diversification

between them is just the direction. "Portside" used when the object located on

the side of the ship. Meanwhile, port bow used to show the object that located

on the front of the Ship.

4.1.4 Noun Phrase

1. The Essex (Noun Phrase)

Meaning: The ship called The Essex

The speaker uses the register as the information of thing to the hearer and the

hearer understands it.

This register has said by mr. Mason, one of the ship owner of the whale-oil business. The researcher interpreted the register as the way they called their ships with a name. "The Essex" is actually a name of the ship used by the main character in order to hunt down the whales. The function of naming the ships is not only differentiating one ship with the other but also be an identity for the man who captained the ship.

2. As first mate. (Noun Phrase)

Meaning: First vice captain.

The speaker uses the register as the information of position given to the hearer and the hearer understands it.

This register said by mr. Fuller, mr. Mason's friend and one of the ship owner from whale-oil industry. This word also said by Owen Chase as he confused by the ship owner's decision to give him a position as the first mate, not a captain. It is clear that Owen has requested a position for a captain, not a vice captain, or in their term are first mate.

3. A one-fifteenth lay. (Noun Phrase)

Meaning: A single payment that fifteen times higher than another.

The speaker uses the register as the information of thing to the hearer and the hearer understands it.

To decrease Owen's disappointment, mr. Mason gives an unusual order for him. That is the payment for one voyage. Owen will get a big fee that another first mate will never get it, that is what mr. Mason said. Owen will get a one-fifteenth lay or fifteen times higher than another first mate.

4. The flukes! (Noun Phrase)

Meaning: A profitably moment

The speaker uses the register as the information to the hearer and the hearer

understands it.

The man on the top of the ship usually yelling this word when he seen the

whale in a distance. Different with register "Blows!" that yelled before "The

Flukes!" this register has shouted in the highest place of the ship and it has

different position with "Blows!" that shouted in the deck area. The function of

this register gives the men a good time and position to hunting down the

whales with huge opportunity and less of risk.

5. Scion of a great whaling family. (Noun Phrase)

Meaning: The descendant of the famous great whaling family

The speaker uses the register as the information of the caste or social level to

the hearer and the hearer uses it as the comparison toward the hearer own

position.

This register said by the ship owner when Owen Chase try to defending

his due as the man who has chosen by the ship owner as the captain has

canceled by an acceptable reason. To force Owen accepted the offer, the ship

owner emphasized that the captain substituted Owen is the man that has a

higher society level rather than Owen himself, that is a scion of a great

whaling family.

6. Our patron. (Noun Phrase)

Meaning: Our protector

The speaker uses the register as the information about influence given by the current person to the hearer and the hearer understands it.

To make sure that Owen Chase would take the offer, the ship owner said the father of captain that has substituted Owen Chase is a wealthy man and their patron.

7. Whale pins (Noun Phrase)

Meaning: A pins made from the whale tooth.

The speaker uses the register as the information of intended thing to the hearer and the hearer understands it.

When the young Tom ask Barzillai about the pins that weared on the coat of the mates (captain's vices), Barzillai answered that they are the whale pins, a tooth from whales they have stab with their lances.

8. A sorrier pack of deck wallopers (Noun Phrase)

Meaning: List of the empty barrels

The speaker uses the register as the information of intended thing to the hearer and the hearer understands it.

This register has stated by the man to give the directions to another man about location. Based on the context, that man going to the list of the empty barrels, the meaning of a sorrier pack of deck wallopers is "list of the empty barrels".

9. Second mate's harpooner. (Noun Phrase)

Meaning: The lance thrower on the second mate's boat.

The speaker uses the register as the decision of intended position to the hearer and the hearer understands it.

The man who gives assign of everyone towards the position on the ship is the first mate. In this case, Owen has responsibility to dividing his men into the correct position based on their ability. Second mate's harpooner, second mate refers to the second vice captain, Joy Matthew. In order to catch down the whales, there are three boats that lead by the captain, first mate, and second mate. In this situation, second mate's harpooner means the attacker or the lance thrower on the boat that lead by the second vice captain.

10. Forty-barreler? (Noun Phrase)

Meaning: A whale contains around forty barrels of oil.

The speaker uses the register as the information of intended value to the hearer and the hearer understands it.

This register used to determined the possibility of oil capacity that provided by the whale depends on its size. There is other register stated by Owen below to reply the question of this register. The word forty refers to the amount and the Barreler refers to a single unit of that amount itself. Then, the meaning of the register is "a whale contains around forty barrels of oil"

11. Fifty. (Noun Phrase)

Meaning: A whale contains around fifty barrels of oil.

The speaker uses the register as the information of intended thing to the hearer and the hearer understands it.

12. Nantucket whale oil. (Noun Phrase)

Meaning: Whale oil produced by Nantucket.

The speaker uses the register as the information of intended thing to the hearer and the hearer understands it.

This words used by Mr. Bond to offer the oil to another tribe when the crew arrived on another land to refill their necessary and trade the oil as the way to get their needs. This kind of register completed the head "Oil" with some contexts such as Nantucket and whale. The contexts give an understanding about the value of the oil itself. At the time, Nantucket is a very huge oil industry and famous with its whale oil. The meaning of "Nantucket whale oil" is the whale oil that produced in Nantucket.

13. The Offshore Grounds. (Noun Phrase)

Meaning: The furthest spot from any lands.

The speaker uses the register as the information of intended location to the hearer and the hearer understands it.

A place that all experienced sailor recognized as the offshore grounds, placed in a thousand leagues along the equator. In this spot, the ship will be on the furthest position from the shore.

14. Twenty fathoms, (Noun Phrase)

Meaning: Twenty rolls of rope.

The speaker uses the register as the information of intended value to the hearer and the hearer understands it.

In any occupation that related to the sea, word "fathoms" used to gauge the depth of the sea. By using the current length of rope in every roll, the sailor used this kind of measurement to gauging the deep of the whale's dive.

4.1.5 Prepositional Phrase

1. East of Halifax, sir. (prepositional phrase)

Meaning: Halifax, one of city on Canada.

The speaker uses the register as the information of intended location to the hearer and the hearer understands it as the aim.

Table 4.1.2

Word Class	Register	Percentage
Noun	8	5%
Preposition	2	1%
Noun Phrase	14	9%
Prepositional Phrase	4	3%
Sentence	98	74%
Compound Sentence	9	5%
Complex Sentence	4	2%
Total	148	100%

Total, there are 148 registers said by the main characters has classified based on its word classes. Separated by its own class, there are lot of registers with different class said in different condition. Some registers are same, but the meaning may different. The meaning of those register has analyzed comprehensively. In this section, in case of what are the register used by the main characters of the movie has unleashed, and the problems were done.

4.2 Discussion

For years to years, Movie in modern era has developed better and better. The producers also brings a lot of elements inside the movie such as coloring the

historical moments to make it as the one best object and story for the Movie. Giving lot of real effects to enjoy the audients, giving a good sounds that match with every scene, an incredible action from the actors and various language that never heard by the public before.

In one side, the movies give the audients an unforgettable experience when it played. In another hand, the movies also change their mind unconsciously to imagining and create the new things on their behavior especially on their looks and language. There are lot of language variation used by the characters inside the movie, from the normal set of language, speech acts, slangs, swear words, idioms, and registers that some people maybe has already knew it and the rest of those language maybe just heard by them.

In this thesis, the researcher has analyzed the Register used by the characters and its influence toward the people around with the current context of situation as the main problem here. Register is a set of language formed as terms used by the people in current groups of current occupation and only works on the current condition.

Register has a lot of type based on its word class such as noun, noun phrase, sentence, and many more. Register usually used to call something related to the occupation using terms. But more than that, register also can be used with different function. In this discussion, the researcher has related his register analysis with speech act, especially for Directives and Expressives. Based on Yule (1996: 54). Directives are those kinds of speech acts that speakers use to get

someone else to do something, and (1996: 53). Expressives are those kind of speech acts that state what the speakers feels.

Based on the findings, the researcher gives an example for each speech act. Directives speech act refers to an order and command. From the findings, there are lots of register formed as an order, usually stated by the superior class such as the captain and mates to their subordinate, in this case is the crew. One of the register formed as the order is "Veer off, Mr. Lawrence" (Sentence Register point 56). For the Expressives speech act, as the speech act to express the feelings, the register that formed as the expressives is "The devil take the Mexican grounds!" (Sentence Register point 110). The analysis toward those two register elaborated below.

There only three factors that makes the register meaning easy to interpret. They are field, tenor, and mode. To analyze the register, the researcher needs to analyze those several aspect of register to get the accurate interpretations. Halliday stated (2004: 33). Field – what's going on in the situation, Tenor – who is taking part in the situation and Mode – what role is being played by language and other semiotic systems in the situation.

From the first example, that is directives speech act formed as register "Veer of, Mr. Lawrence". As the previous explanation on findings towards this register, this register stated by the captain to one of his man to step aside using term "Veer of". It is clear that the captain used both of register and directives speech act together. For the combination of register and expressives speech act there is a term "The devil take the Mexican ground!" stated by Owen Chase to

express his excited feelings when he found the whale signs around him. The relation between the register and the user is the function of the register itself. This register stated as the representation of excitement of the speaker to all men on the ship for their success in finding the best location to hunting the whales and the hearer responded it positively followed by their cheering voices.

What the researcher explained above has a purpose to make the reader expanding their mind toward the unlimited utilization of language. People can combining lot of language variations as much as necessary. Then, the variations of language will expanding by taking a look at the language used by the characters on the movie analyzed by the researcher that usually utilized both of two kinds of language type, that is register and speech act.

By this discussion, the reader may have an initiative to develop their language skill and variation to create new terms to used in their conversation both on small and colossal scale of group and use the register they have created to many purposes as much as they want.

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter elaborated the conclusion and suggestion for the reader. The Conclusion summarized the main points of the previous chapter. The suggestion consist of the proposition and hope of the researcher towards the next researcher or anyone who interesting with register.

5.1 Conclusion

This research aim has focused on the use and meaning of register stated by the characters on the movie. The movie itself is an original story version of Moby Dick titled "In the Heart of the Sea". The story tell the struggling of the whale hunters when they meet the hugest whale they ever seen, but the researcher here focused on the language variations they used, that is register.

Based on the previous explanations towards the register itself. Register is a set of language formed as term that only state by the current people in current group of current occupation in current situation and condition, register is a very special language that not everyone understand about it. In this chance, the researcher has collected all register used by the whale hunter and analyzed all of them.

The first problem is the register stated by the character, answered by mentioning the register. The register stated is "Get the green stuff." The second problem is interpreting the meaning of the register. In how to analyze the meaning, the context must be identified first. The context here is the sailors

loading up the stuff to the ship. When the order has spoken, one of them starts to picking up the vegetables. Then, "Green stuff" here means "vegetables". Overall, the meaning of the register is "loads the vegetables". The third problem is the relation among the register, speaker, and the hearer. The speaker is the man who use the register as a command, the register used as a request or an order, and the hearer become the doer or the one who taking the action as the response to the intended order.

5.2 Suggestion

The researcher hopes that the next researcher who are interested to entering the sociolinguistics field especially in register area can enlarge the object of the research and fixing the further problems. Register is not only a word, phrase, or sentence. Sometimes, there are two or more groups that used the same register but in the interpretation, the meaning is different from one register to the other register.
