## CHAPTER V CONCLUSION

Based on the analysis in chapter 4, this research resulted three conclusions related to types of adjacency pair constructed by Roy Miller and June Heaven in *"Knight and day"* movie. There are 87 data found in conversation between Roy Miller and June Heave in *"Knight and day"* movie. They are as the following detail: one data of greeting-greeting, 2 data summon-answer, 4 data apology-minimization, 28 data question-answer, 11 data request-acceptance/refusal, 1 data offer-refusal, 4 data blame-admission, 1 data invitation-acceptance, 7 data assessment-agreement/disagreement, 12 data command compliance/incompliance, 1 data suggestion-refusal, 6 data assertion-agreement/disagreement, and 9 data announcement-acknowledgement. The dominant type of adjacency pair comes from question-answer that got 28 data or 31.8%. Those data consist of 24 data preferred second pair part and 4 data dispreferred one. Besides, the least data of the type of adjacency pair is also stuck namely invitation and suggestion type. Both of the get one data or 1.1% from conversation spoken by Roy and June. An agent has special mission has to be done so that it seldom occurs an invitation and suggestion.

From 87 data coming to 13 types of adjacency pair, the researcher also found some conversation that occur pre-sequence and insertion sequence. There are 5 data that consist of pre-sequence and 6 data insertion sequence. Data of pre-sequence are typed in announcement-acknowledgment and command-compliance by amount 1 data for each type and question-answer 3 data while the data for insertion sequence are typed in question-answer, assessment-agreement, announcement-acknowledgement, and request-refusal each of them got 1 data and command-compliance got 2 data. Whole data gotten from *"Knight and day"* movie are constructed in 271 turns between Roy and June. Then, those turns are divided into two part; 138 turns are taken by Roy which 82 are included into First pair part and 59 turns are included into second pair part; and 133 turns are taken by June by details of 72 turns are included into first pair part and 64 turns are included into second pair part.
