#### ABSTRACT

Rosadan, Robbi Rizal. 2018. Register Used by "HSFC Jombang" Motorcycle Community in Social Media Whatsapp Massager. Thesis. English Department, Faculty of Arts and Humanities. The State Islamic University of Sunan Ampel Surabaya.

Advisor: Prof. Dr. Zuliati Rahmah, M.Pd.

Key words: Register, Honda Street Fire Community Jombang, register function

This thesis examines the registers contained in the motorbike bike community. This study focuses on the word register found in the group WhatsApp motorcycle community Honda Street Fire Community Jombang (HSFCJ). The purpose of this study was to determine the registers used by the motorcycle community and to explain the register functions used by the motorcycle community found in WhatsApp group chats.

This is a descriptive qualitative research and data are taken from group whatsapp conversations, observations, and interviews with community members on motorcycle. The study participants were all members of the motorcycle community and five group members interviewed. The study was conducted by researchers for two months, March and April.

As a result the researcher found thirty two register words used by HSFCJ members. From the thirty two register data, the researcher found three types of registers used in this motorcycle community. They are fourteen registers in Indonesian, seventeen registers in English, and one register in Java. The researcher obtained the register function used by this motorcycle community. The interview results show that there are four register functions used by group members. They are functions (1) to show intimacy, (2) to show prestige, (3) to increase solidarity, and (4) to show identity.

Overall, from the findings of this study, the researcher has proven that registers exist at Honda Street Fire Community Jombang (HSFCJ). This research was able to reveal the word register used in the motorcycle community. Then each word register has meaning and function. The researcher suggests to the next researchers who might conduct research in the field of registers to analyze other elements and use other methods. There are many ways to do research in the register field at different points of view. Subsequent researchers can also combine other theories to find new results. Other communities can also be an interesting new object to study.

#### INTISARI

Rosadan, Robbi Rizal. 2018. Register Used by "HSFC Jombang" Motorcycle Community in Social Media Whatsapp Massager. Thesis. English Department, Faculty of Arts and Humanities. The State Islamic University of Sunan Ampel Surabaya.

Advisor: Prof. Dr. Zuliati Rahmah, M.Pd.

Key words: Register, Honda Street Fire Community Jombang, fungsi register

Skripsi ini meneliti tentang register yang terdapat pada komunitas sepedah motor. Penelitian ini focus pada kata register yang terdapat pada group whatsapp komunitas motor Honda Street Fire Community Jombang (HSFCJ). Tujuan penelitian ini untuk mengetahui register yang digunakan oleh komunitas sepedahmotor dan untuk menjelaskan fungsi register yang digunakan oleh komunitas motor yang ditemukan dalam obrolan grup WhatsApp.

Ini adalah penelitian kualitatif deskriptif dan data diambil dari percakapan digroup whatsapp, observasi, dan wawancara anggota komunitas sepedah motor. Para peserta penelitian ini adalah seluruh anggota komunitas sepedah motor dan lima orang anggota kelompok yang diwawancara. Penelitian dilakukan oleh peneliti selama dua bulan yaitu bulan maret dan april.

Hasilnya peneliti menemukan tiga puluh dua kata register yang digunakan oleh anggota HSFCJ. Dari tiga puluh dua data register, peneliti menemukan tiga jenis register yang digunakan dalam komunitas sepeda motor ini. Mereka adalah empat belas register dalam Bahasa Indonesia, tujuh belas register dalam bahasa Inggris, dan satu register di Jawa. serta peneliti memperoleh fungsi register yang digunakan oleh komunitas sepeda motor ini. Hasil wawancara menunjukkan bahwa ada empat fungsi register yang digunakan oleh anggota grup. Mereka adalah fungsi (1) untuk menunjukkan intimasi, (2) untuk menunjukkan prestise, (3) untuk menunjukkan solidaritas, dan (4) untuk menunjukkan identitas.

Secara keseluruhan, dari temuan penelitian ini, peneliti telah membuktikan bahwa register dikeluarkan di Honda Street Fire Community Jombang (HSFCJ). Penelitian ini mampu mengungkap kata register yang digunakan dalam komunitas sepeda motor. Selanjutnya setiap kata register memiliki arti dan fungsi. Peneliti menyarankan kepada peneliti berikutnya yang mungkin melakukan penelitian di bidang register untuk menganalisis elemen lain dan menggunakan metode lain. Ada banyak cara untuk melakukan penelitian di bidang pendaftaran di berbagai sudut pandang. Peneliti selanjutnya juga dapat menggabungkan teori lain untuk menemukan hasil baru. Komunitas lain juga bisa menjadi objek baru yang menarik untuk dipelajari

#### **CHAPTER 1**

## **INTRODUCTION**

There are some points to discuss in this topic; they are the background of the study, statement of the problem, objectives of the study, the significance of the study, scope, and limitation, and definition of key terms.

## 1.1 Background of Study

Language is the most important element to interact with the others it is used for communication tool in their social life. Language and society cannot separate because language is a communication tool used by certain people to create interaction and communication, in their social life. Like what is said by Wardhaugh (2006) that language allows people to say things to each other and express communicative needs. Since every people who live in certain social life have their own languages, that is why language has it is own characteristics it depends on when, where, and with whom the languages are used. Underlying the statement before, it concludes that communication happened as long as people do the interaction with others.

Communication is happened in social life, mentioned communication of people at school, house, office, market, and others. Furthermore, communication is not only done directly by a person or a group of communities. Communication can be done through social media, with social media a person or a group of communities can communicate faster and more often. Social media is diverse, ranging from WhatsApp, Facebook, E-mail, Instagram, twitter etc. In Indonesia, most people use social media WhatsApp to communicate both personally and group.

Those differences place of communication influenced their language use for doing communication. Every occupation has a different language which is used in their group to show their identity, called *register*. Wardhaugh (2006) stated that registers are set of language items associated with different occupational or social groups such as surgeons, airline pilots, bank managers, sales clerks, jazz fans, and computer community. The register is a variety of language used to a specific purpose. Halliday(1978) stated that register is sets of vocabulary items that are used by an individual or a group or community in a certain matter and specific purpose. The register is a variety defined by reference to the social context. It means register has a strong relationship with the social context in a particular society (Fishman, 1972).

Ferguson (1994) stated that people participating in recurrent communication situations tend to develop similar vocabularies, similar features of intonation, and characteristic bits of syntax and phonology that they use in these situations. It means that register is a variant of a language that is used in the particular jobs or communities to describe the specific vocabulary associated with different occupational groups and usually cannot be understood by other people or other groups of the community. It could be described as an occupational style. Register helps people to express their identity at a specific time or place and how they seek to present themselves to others. Different social interaction also becomes the factor of the different register in using language. Such as the different language which is used by the computer community, a language which is used by a lecturer in the class or a language which is used by the photographer community.

This different language between communities is also happening in the motorcycle community. There are a lot of new words being created in the motorcycle community, but another group or community outside did not understand the new words as well as the member of the motorcycle community itself. This factor leads the researcher to analyze and describe the meaning the use of the new words which may include to the register which is used by the motorcycle community.

Many researchers have conducted studies on the register. Ardi (2013) wrote his thesis about the translation of military register which seems to be very respectful to superiors. It aims at discovering the ways of finding problems in the subtitle of the military register and its implication toward teaching the translation subject. In this research, Ardi (2013) collected the data from the movie and transcribed from the conversation in the movie. Other researchers (Yulianto, 2014; Prasetya, 2015; Fadhilah, 2015) conducted researches which were collected data about register by transcribing the conversation that was taken in the movie. Both Yulianto and Prasetya focused in the same sides in their research about register that was existed in the movie and the meaning of the register is, but Fadhilah (2015) in her research were adding the categories of the register as her focus. However, that previous research has a lack of their data that were taken from the movie. While in every movie scene and dialogue, the register that is

existed is not the same in the real world in the practice in our daily life. In some occasions, the words which used in the movie dialogue have been changed in meaning which has a different meaning in the words that we use in our daily life. This happens because the words must be matched with the movie stories context. There is a lot of research about register that used the movie as an object

Another researcher conducted register research that the data were taken from Facebook Page. Rahmawati (2014) took register from Soccer page on Facebook, but she took the data from the fans' interaction on comment box in that Facebook page. The lack of this study, Facebook page today is rarely used by the public. Especially in Indonesia, nowadays people communicate in personal or group chatting using WhatsApp.

From the previous researches above, the researcher found the gap for the recent research, the data in the previous researches were taken from the movie and Facebook page. In this recent research, the data is collected from the WhatsApp group of community. The difference is in the sense of situation of the use and the benefit during register is used in the community.

It can be concluded that the research about the register using the movie does not use the language directly because the dialogue in the movie is mostly edited by the producer. Research about the register that uses the movie also has a lot. While for research using Facebook did not get satisfactory results because Facebook is now rarely used by the people of Indonesia.

To fill the gap that existed in the previous researcher, the researcher joined group WhatsApp of the motorcycle community Honda Street Fire Community Jombang 'HSFCJ' to get the data about the register. It is intended to get the sense of the use and the benefit during register is used in the group of the community directly among the community. In this case, the researcher makes sure that the register is actually used in the community. Until the recent researcher writes this proposal thesis, the recent researcher has not found the register research talks about registers exist among the motorcycle community daily communication, especially through WhatsApp. The recent researcher decides to focus on WhatsApp group communication because WhatsApp is popularly used today. So, the communication is up-to-date and the possibility of the register used is higher in using than another social media.

To analyze the register that is used by motorcycle community, the researcher analyzed the component of situational factors in this community, it can be analyzed through the setting of the place, time, and in what environment the languages are used. The situational factor in register is also suggested by Halliday (1978) said that to analyze the situational factor underlying the use of register, he began to develop his influential framework in analyzing the context of situation by these three parameters; FIELD: what the language is being used to talk about; TENOR: the role relationships between the interactant; and MODE: the role language is playing in the interaction. Furthermore, besides to analyze the situational factors of the register, the function of the register has its own importance to be analyzed. After knowing the situational factor, there are also register function. Halliday mentioned that the function of registers appears as an instrumental function, personal function, social relationships or interactional

function, regulatory function, representational function, heuristic function, and imaginative function.

In this study, the researcher focused on the analysis of a sociolinguistic study of the register as a kind of language variation. The researcher uses the motorcycle community because this community is closely related to society and the researcher has not found any study that discusses motorcycle community before. The weakness of the previous study is almost all previous researches used movie in their research. In the movie, the script is planned before. And although there are so many registers in the movie, every people can interpret and know the meaning of that register. In this case, the register may be well known by people who have watched the movie; it is not only understood by the community in the movie.

From those gaps, the researcher conducted research about the register which is existed in WhatsApp group chatting of the motorcycle community HSFC Jombang. The motorcycle community is a community very close to the environment. Even every activity is little or much going to be related to the community. Sometimes conflicts occur between citizens and the member of the motorcycle community. This is bad for both parties. This research register aims to create peace between the member of the motorcycle community and the environment and also to create a mutual understanding between the member of the motorcycle community and the environment.

HSFCJ is the community for the Honda CB150R user. HSFCJ is located in Jombang, East Java. This community was created because of the unity in

Gathering, Touring, and Modifying. And the main reason for this community is passion and kinship (<u>https://hsfcjombang.wordpress.com</u>). In this research, the researcher joined the community to get the data, because there are many registers that cannot be interpreted without joining the community.

## **1.2 Research Problem**

Based on the background of the study is explained above, this study undertakes to answer the following questions relate to the explanation above:

- What registers are used by HSFCJ motorcycle community in WhatsApp group chatting?
- 2. What are functions of these registers used by HSFCJ motorcycle community in WhatsApp group chatting?

## **1.3 Research Objective**

From the formulation of the research problem above, the writer is able to construct the research objectives below:

- 1. To find out registers used by motorcycle community in WhatsApp group chatting.
- 2. To explain the functions of those register used by motorcycle community that found in WhatsApp group chatting.

## 1.4 The Significance of The Study

With this study, the researcher hopes the reader got the understanding about registers used by the motorcycle community in WhatsApp group chatting. The researcher hopes that this research gives the reader knowledge about registers and also gives a specific contribution to the Arts and Humanities Faculty, especially for the students of English Department.

#### **1.5 Scope and Limitation**

The research focused on function and meaning of register which is used by the motorcycle community in WhatsApp group chatting. It discussed the unique word that used to mention someone or something in their community. The limitation is the register which is existed in two months WhatsApp group chatting of motorcycle community HSFC (Honda Street Fire Community) Jombang.

#### **1.6 Definition of Key Terms**

In order to avoid misinterpretation about the use of terms; it is important for the writer to give the suitable meaning of the key terms. Some terms are defined as follows:

## **1.6.1 Language Variation**

Language variation, a special language used by certain communities such as dialect, idiolect, register, and social dialect. Holmes (2001) variety is a board term which includes different accent, different linguistics style, different dialects and event different language which contrast each other for social reason.

#### 1.6.2 Register

The register is a term that represents the language of a community group that has a common interest or occupation, used in situations associated with that group. It is a particular word spoken by a particular person or group only known or understood by the group itself. Wardhaugh (2006) stated that registers are sets

of language items associated with different occupations or social groups such as surgeons, airline pilots, bank managers, sales clerks, jazz fans, and computer communities.

### 1.6.3 Communities

Communities are people who live in certain areas and have the same habits to make the basis for greater interaction among members, compared to populations outside of group members. According to Hillery Jr. (1968) Community is a group of people who live in the area and have a relationship to interact with one another.

## 1.6.4 HSFCJ

HSFCJ is Honda street fire community Jombang, the community for the Honda CB150R user in Jombang, East Java. This community was created because of the unity in gathering, touring, and modifying. And the main reason for this community is passion and kinship. <u>https://hsfcjombang.wordpress.com</u>

#### 1.6.5 WhatsApp

WhatsApp is an application for smartphones that are used to exchange messages. WhatsApp app uses an internet connection to communicate. By using the WhatsApp group, we can chat online with members, share files, exchange photos and more. HSFC Jombang also uses the WhatsApp group to communicate with fellow members. <a href="https://www.WhatsApp.com/about/">https://www.WhatsApp.com/about/</a>

#### **CHAPTER 2**

## **REVIEW OF RELATED LITERATURE**

#### **2.1 Theoretical Framework**

This part presents the theories that the researcher uses to analyze the data. The explanation about the research subject that related to the thesis and also the related studies that closely similar to the topic of analysis in this research.

## 2.1.1 Language Variety

Language variety is used in society and community. It is from a different background. We have a variation of language; it can be from culture, region, profession, habit, etc. But we must understand our mother language. Then, they can learn the variation language.

According to Nababan (1993), the varieties are the application of language; they exist in all language. We have already ignored the fact that every language has more than one variety, especially in the way it is spoken. This variation in speech is an important and well-organized aspect of our daily life as language users in different regional and social communities.

Ismiyati (2004) stated another opinion dealing with language variety. She stated that a multilingual society consists of many different groups with different cultures and varieties of language. The writer concludes that every group of people use their own variety to differ from another, we can also say that language variety is also linked with the social environments such as social class, education, ages, and a number of other social.

## 2.1.2 Register

Registers are specific sets of vocabulary items associated with a different occupational group or the language of groups of people with common. For example, the language used by airplane, pilot, commentators, managers, climb etc. Holmes (2001). For most people, the conversation is the most common type of spoken language that they produce. But people typically listen to many different kinds of spoken language: television shows, commercials, radio or television news reports, classroom lectures, political speeches, sermons, and so on.

Written language also plays a very important role in daily life for many people Biber and Conrad, (2009). In general terms, a register is a variety associated with a particular situation of use (including particular communicative purposes). The description of a register covers three major components: the situational context, the linguistic Biber and Conrad, (2009).

Based on Halliday(1978), the special terms use the notion of context of the situation, such as:

## 2.1.2.1. The Field

It is what the language is being used to talk about, including the topic and interactants or what kind of language used; specialized knowledge of the field (E.g. scientist writing for an academic journal); Common knowledge of the field. (E.g. the reader of a newspaper article).

## 2.1.2.2. The Mode

It is the role language is playing in the interactional. The function of the text in the event, including therefore both the channel taken by the language (spoken or written, extempore or prepared and its genre, or rhetorical mode, as narrative, didactic, persuasive, 'phatic communion' and so on

a. Language can be:

- 1) Written (email, letter, text/ discourse)
- 2) Spoken (speech or conversation)
- 3) Written to be spoken (e.g. a political speech)
- 4) Spoken to be written (e.g. recording script in subtitling)
- b. Language can be:
  - 1) Spontaneous (e.g. conversation);
  - 2) Planned (e.g. a composition or article).

c. The level of how intense or how language feedback is. It can be the possibility of having:

- 1) Immediate feedback (e.g. conversation)
- 2) Rapid feedback (e.g. emails);
- 3) Delayed feedback (e.g. letters).

## 2.1.2.3. The Tenor

It is the role relationships between the interactant. In Eggins(1994) broke down Tenor into three elements; power, affective involvement, and contact. The relationships among the interactant are defined as: power (equal/unequal) Contact (frequent/infrequent) and effective involvement (high/low).

The writer would use the theories to explain clearly about language variety. In doing analyses, the writer chooses register which is part of language

variety. The writer would identify some register which used in the motorcycle community. The writer analyzes the register which is used commonly in speaking

#### 2.1.3. Meaning

Meaning is what is in their message to the recipient, and what is received from the current structure. The meaning of Hurford (2007) state can be divided into two parts, literal and non-college meaning. The online meaning raises two main meanings, first, the meaning of words and sentences basically do not depend on the context of use. Second the meaning of general expressions. The meaning of life shows the meaning of words in the language. For example, in the phrase "I am hungry", it can be well directly speaking that is hungry (Hurford, 2007).

Later, Saeed (2003) stated that the meaning was not stated directly. For example, in the sentence "I can eat horses", that does not mean that the speaker will really be a horse. That means the person really is starving Saeed (2003). The use of non-state languages has traditionally been called figurative and rhetorical studies include metaphor, irony, metonymy, synecdoche, hyperbole, and litote. Here is the explanation a metaphor is a statement that one thing is something else, or that a color is made between things that are basically not the same.

Authors are of different types on the list because they do not have literal facilities that are not members of the HSFCJ motorcycle community do not understand the meaning.

### **2.1.4 Function Register**

Registers are unique words that belong to a particular group and only those groups can understand the intent of the word register. We can understand the function of the register from the statements of some linguists. Wardhaugh (2010) says that registering facilitates communication other than as a way to show identity and express feelings. From the statement above it can be understood that the function of the register is to communicate with others and as a means to express feelings and ways to show identity in a particular group.

Disseminate the above statement, implementation to express feelings and show the identity of the speaker (Holmes, 2012). Different groups of people who use them or them as a result of using the register. This type of register is to express feelings, support group members of people to show and explain their feelings. The last type of list can be used to show the effectiveness of communication, basically because they have made a vocabulary agreement.

#### CHAPTER 3

## **RESEARCH METHOD**

In this part, the researcher would like to explain a method that uses to analyze the data. In this research, the researcher uses the descriptive qualitative method. This part includes of research design, instrument, data and data sources, data collection and data analysis.

## **3.1. Research Design**

The researcher conducted descriptive qualitative research. According to moleong (1990) "a qualitative research is a research without any calculating and numbering". The researcher takes qualitative research because this research identified the register that is used in the motorcycle community's language and describes the meaning of register word that is used in the motorcycle community's WhatsApp group chatting.

This research focused on the use of register words motorcycle community. Those are meaning and function of register word in motorcycle community's WhatsApp group chatting.

## **3.2 Instrument**

There were two instruments in this research. They were participant observation and interview. In this research, participant observation helped the researcher to attain the word register in the community's group WhatsApp. By joining the HSFCJ community's WhatsApp group chatting, the researcher focused to take the register that used among the members' conversations at WhatsApp

group chatting. The researcher wrote register that is used by the member of HSFCJ in group WhatsApp massagers.

Then the researcher got meaning and function of the register from interviewing the member of HSFCJ. The researcher interviewed five members, to get the meaning and the function of word register.

## 3.3 Data and Data Sources

The data in this research is register words that are used among the member's conversations at WhatsApp group chatting. The data were coming from the member's conversation and the researcher noted those word register in the field note. The data of word register were one word or phrase.

The source of data is from the participant observation of researcher joined the group WhatsApp of HSFC Jombang for two months and interview the members of HSFC Jombang.

## **3.4 Data Collection**

In collecting the data, the researcher used the documentation method. The ways are the following:

- The researcher visited the motorcycle community's gathering. Introducing himself and the plan of his research.
- Then the researcher joined the WhatsApp group of HSFC Jombang.
- The researcher wrote or screenshot in their conversation from the member of HSFC Jombang in WhatsApp group to find the register words and phrases in two months.

The researcher transcribed all register from the WhatsApp group of

HSFC Jombang in two months.

Example:

#### Data 8

This conversation took place at 13:54 on March 5, 2018. Figure 3.1 is obtained by the researcher from conversations in a WhatsApp group that talk about their motorcycle tires.

Figure 3.1 Speedfreak

"Speedfreak" is another register word found by the researcher in conversations between HSFCJ members in the figure. In this community, the word "speedfreak" has the meaning of inconsiderate or mentions to people or members who drive recklessly. This unique word has a lexical meaning (speed; how fast something moves, very fast movement, how fast something happens and freak: a thing, person, animal, or event that is extremely unusual or not like any other type). In a conversation above one of the members joked that he loved doing "speedfreak". Meanwhile, the HSFCJ is prohibited from speedfreaking, because this thing endangers their self and others.

#### Data 11

This data occurs in a group conversation when one member asks about a motorcycle. This conversation occurred on March 7, 2018.

Member 1 : Bensinku kok gelis entek kenek opo rek (How come my gasoline runs out quickly, that's why my friends) Member 2 : <u>CCne</u> jalok dicilikno titik bro (The CC asked for a slight reduction bro) Member 3 : Jawaban super (Super answer)

The word that is registered in this conversation is "CC". This word has a lexical meaning (cubic centimeter). In the HSFCJ motor

community, this word means knowing how fast the motor is. It can also be interpreted as the motorcycle's speed capacity from members. The conversation above occurred when one member asked why the bike could be wasteful of fuel. Then another member answer that "CC" from the vehicle needs to be reduced.

## **Reference of interview guide**

Apa arti dari kata-kata dalam tabel berikut? Dan bagaimana penggunaannya?

No.	Register	Arti	Fungsi
A	NRA	Member Registration Number	Number for members who have become members
В	Optional riding	Drive casually	Leisurely drive is not in a hurry as the road will be skipped
С	Member	Members who have passed the prospect	Distinguish between members who have become members with new members prospect

## 3.5 Data Analysis

The researcher analyzed the data with the following step:

- Joining WhatsApp group of HSFC Jombang to get data from members' conversation.
- Identifying conversation that can be categorized as data of registers.
- Classifying data that can be categorized as registers,

- Analyzing the context of the data; identifying the difference between lexical and contextual. In the identifying process, the researcher makes a table of the register and its meaning that be got from interview guide with the member of HSFCJ. In the table of the register, the researcher inputted the classifications of the meaning and the function of each word register. The classifications are coming from two types of the meaning of the word register, lexical and contextual. The researcher classified the register in the type of lexical meaning or contextual meaning according to the response of the interview guide with the member of HSFCJ. The researcher marked one of the types of the meaning of word register with (v) sign. The examples can be seen in Table 4.2.
- Analyzing data by function.
- Drawing a conclusion and suggestion based on the data analysis.

#### **CHAPTER IV**

## **RESEARCH FINDING AND DISCUSSION**

This chapter contains information on how the researcher answered two problems formulated in this study. The researcher found the register used by HSFCJ members in WhatsApp massager for two months. After finding the register the researcher tries to find out the meaning of the register from the interview with some members. After obtaining the meaning of the register the researcher categorizes in a lexical or contextual sense.

The interview also aims to find the function of the register that has been found by the researcher. Interviews were conducted to five members of the HSFCJ motor community who are still active. After getting the interview result, the researcher analyzes the interview result to get the meaning and function of the most appropriate registers.

## 4.1. Finding

### 4.1.1. Kinds of Register

The researcher got 32 register words contained in the motor community HSFCJ. The register found by the researcher answers the first problem formulation. All these registers have a meaning related to HSFCJ motor community.

The researcher divided register into three kinds of the register; there are English register, Indonesia register, and Java register. 32 register words that the researcher got consists of 17 English register words, 14 Indonesia register words, and one Java register words. All of the registers are showed in table 4.1.

No	Language	Register			
1	English	Prospect, up, member, box, may day may day, no gangster, no toletot, start engine, optional reading, CC, homebes,			
		speed freak, sport touring, raiser, newbie, portal, gas			
		Pengondisian, pantauan, kopdargab, kopsan, cibi,			
2	Indonesia	penjemputan, izin melintas, ban cacing, postic, NRA, R26,			
		brek <mark>et, tourwis, #086</mark>			
3	Java	Sowan.			

Table 4.1 All Registers Used in Honda Street Fire Community Jombang.

## 4.1.1.1 English Register

After the researcher conducted research for two months. The researcher got an English register. All the English registers showed in table 4.2.

In this table, the researcher shows the register, the meaning of register and type of meaning of register. Type of meaning classified in lexical and contextual meaning.

N	Register	Meaning	Type of Meaning		Used in
No			Lexical	Contextual	conversation
1	Prospect	New members who undergo the process of becoming members by completing several requirements needed.		V	43
2	Up	There are important conversations or announcements which are drowned in a previous chat group and need to be summoned.		v	25
3	Member	Members who have passed the prospect level.	v		11
4	Box	Extra luggage behind the motor.		v	7

Table 4.2 English Register Used in Honda Street Fire Community Jombang.

5	Mayday Mayday	Need help		V	4
6	No Gangster	We bikers are not gangsters		v	35
7	No Toletot	Do not horn suddenly, if you meet on the street just say hello is enough		×	21
8	Start Engine	Turning the motor engine on		v	6
9	Optional reading	Drive casually	v		16
10	CC	Centimeter cubic	v		1
11	Homebes	Home basecamp	v		1
12	Speed freak	Inconsiderate riding		v	1
13	Sport touring	Motorcycle shop		v	4

14	Raiser	A place to install the steering wheel	v		1

17	Gas	Departing or can I mean to participate		v	22

# 4.1.1.2 Indonesia Register

The researcher got sixteen registers in Indonesian. The most frequent Indonesia registers that appear in this research is "izin lintas" with 82 times. All registers in Indonesian showed in table 4.3.

No	Register	Meaning	Type of Meaning		Used in
		wicaning	Lexical	Contextual	conversation
1	Pengondisian	The process before welcoming guests from other regional HSFC clubs or other motorcycle communities who ask to be accompanied		V	3
2	Pantauan	Monitoring members of HSFC from another region who pass Jombang		v	75
3	Kopdar gab	Gathering fellow members combined with other regions		V	12
4	Kopsan	Gathered out of the kopdar schedule		v	7

Table 4.3 Indonesia Register Used in Honda Street Fire Community Jombang.

5	Cibi	CB Motor		V	9
6	Penjemputan	Pick up guests or members		v	1

8	Ban cacing	The tires which are not in the standard		v	1
9	Postic	Member of HSFC Ponor <mark>og</mark> o	v		7
10	NRA	Member registration	v		2
11	R 26	one kind of CB tires	v		2
12	Breket	Additional box buffer	v		1
13	Tourwis	Touring tours		v	15
14	#086	Member Registration Number	v		18

# 4.1.1.3 Java Register

The researcher got one registers in Javanese. It is a register word "sowan". It is described below.

No	Register	Meaning	Type of	f Meaning	Used in
		Source is one of the	Lexical	Contextual	conversation
1	Sowan	Sowan is one of the ways requirements to be a member, by instructing prospect members to a certain place so that prospect members can find out a particular place and field on the way.		v	3

Table 4.4 Java Register Used in Honda Street Fire Community Jombang.

The three tables (Table 4.2, Table 4.3, and Table 4.4) show that each register has different meanings. Each word has contextual and textual meaning. Based on the table above there are several textual words and there are several other words that have contextual meaning.

The difference between textual and contextual meanings here is according to the meaning of words used in the HSFCJ motor community in the WA group. But there are also some words that have both meanings that are used in community observation.

# 4.1.2. Meaning

## 4.1.2.1.English Register in HSFCJ

This register consists of 17 register words in English they are "prospect", "up", "member", "box", "may day may day", "no gangster", "no toletot", "start engine", "optional reading", "CC", "homebes", "speed freak", "sport touring", "raiser", "newbie", "portal", "gas".

# Data 1

The first conversation was obtained by the researcher on 15 March 2018 at 20:67. This conversation takes place when one member is having an accident. Then one member asked if there was one other member whose residence was close to the incident.

Member 1	: Ada yang rumahnya di Ngoro?
	(Is there any member coming from Ngoro?)
Member 2	: Disamperin anak <i>prospect</i>
	(Be visited by the prospect)
Member 3	: Sudah ta?
	(Have it done?)

The second conversation tells about a joking conversation between members of HSFCJ. This conversation was obtained by the researcher on 1 April 2018 at 17:42

Member 4	: Aku sudah <u>member</u>
	(I've become a member)
Member 5	: Y
	(Yes)

Words register on the first conversation is "prospect" and "member" is the word register on the second conversation. The two word registers in the first and second conversations are the English word register used by the HSFCJ motor community. This register has a lexical meaning "prospect" (a person regarded as likely to succeed or as a potential customer, client, etc.) and "member" (a person, country, or organization that has joined a group, society, or team.).

While the contextual meaning and function of both registers obtained by researcher through interviews some members of HSFCJ. The "prospect" register has a contextual meaning that he is a new member who has not become an official member of the HSFCJ motorcycle community. Prospect are all newly registered HSFCJ members, all members who have not graduated and are still on probation. As with the "member", these register means that he is an official member of the HSFCJ motor community that has passed the prospect level. And, "member" is a member who already has an official registration number.

The researcher interviewed some members of the HSFCJ community to get the data. The function of the word "prospect" and "member" registers is as a differentiator between the new members who are still undergoing the prospecting process with "members" who have become official members of the HSFCJ motor community. Usually, the word "prospect" is written in the name of the new member and for the "member" is written the official member number behind his name.

# Data 2

This data is a permit to do the trip. This permit is often used to inform that members of the HSFCJ motor community want to travel. This letter is often used by members even every day there are uploaded in the group.

Membe	r: assalamualaikum dulur
	salam bikers
	izin melintas
	1 <u>cibi</u> lesatria
	Capung <i>prospect postic</i>
	Nopol: s 2860 oj
	Warna: merah
	Dari: jombang
	Tujuan: Surabaya
	Rute: jombang-lamongan-gresik-surabaya
	H/T: ju <mark>ma</mark> t, 1 juni 2018
	SE: sekarang
	Keper <mark>lua</mark> n: makaryo
	CP: 085546391021
	Nb: optional riding sesuai sikon jalan dan rider dominan
	patas
	Mohon pantauan untuk wilayah yang diliwati
	No <i>portal</i> , no ngopi, <i>no telolet</i> tin tin ae cukup
	Matur suwun sanget dulur
	Assalamualaikum
	We're bikers <u>no gangster</u>

From the conversation, the researcher found registers "cibi", "prospect postic", "optional riding", "pantauan", "portal", "no tetolet", "not gangster". It has two Indonesian registers "cibi", "pantauan/monitoring" the lexical meaning is (pantauan/monitoring: monitor results). And five English registers that some have lexical meaning (optional: available to be chosen but not obligatory, riding: the sport or activity of riding horses, portal: a doorway, gate, or other entrance, especially a large and imposing one, no or not: used with an auxiliary verb or 'be' to form the negative and gangster: a member of a gang of violent criminals.)

Contextual meanings and functions obtained by the researcher after conducting interviews. The word register "cibi" have contextual meaning is CB motor (motor used by motor community HSFCJ), "prospect postic" new boy who joined HSFC motorcycle club in Ponorogo, "optional riding" relaxing drive, the "monitoring" has meant monitoring the HSFC members from other areas that pass through Jombang. This word is usually intended for monitoring, viewing or supervising members of HSFC from other regions or Jombang region itself, "portal" welcome party for guests (members) from other community (region), this is the way to treat where members are served plenty of food or drink. Usually, the member who gives the "portal" is an official member. "No telolet" no horn suddenly, if you meet on the street say hello enough. "Not gangster" our bikers are not gangsters

The register word "Cibi" mentions the motor City Bike or abbreviated CB. "Postic" serves differentiator for members from other regions, because in every area there is usually a motor community that uses the same vehicle. In order to make it easier to know someone from the motor community from the region where it is a distinguished name such as jombang as HSFCJ while Ponorogo as Postic. "Optional riding" tell the other members that the members in question are riding in a hurry as the road passes. "Monitoring" has a function as an appeal to monitor other members from outside the region or jombang region itself, so that when members experience difficulties or if there are some emergency conditions, they can be immediately assisted or at least look for other members who can help. "Portal" serves to tighten fraternity, welcome other members and or mental tests for members who are still in the prospecting process. "No toletot" serves to remind other members not to horn suddenly because it could endanger other riders, is because the horn of a motorcycle bike is very loud. "Not gangster" this word for as a reminder to all members that they are not negative gangsters, they are a motor community that is not like gangsters, and has a code of ethics and should do good and socialize with the community.

### Data 3

The figures below were found by the researcher on March 19th. Figure 4.1 and 4.2 are figures of conversations between several members in the WhatsApp group. In figure 4.1 shows about one member asking at 6:25 minutes then another member responds and figure 4.2 shows the conversation of some members who sell certain items.

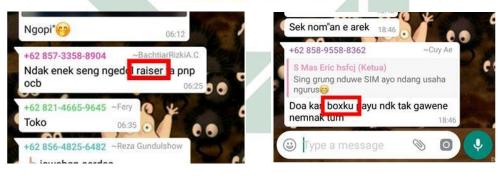

Figure 4.1 Raiser

Figure 4.2 Box

The two images above show there are two word registers used by the HSFCJ motor community. The first word is "box" while the second word is "raiser". Both include the English language register used by members of the HSFCJ motorcycle community.

"Box" has a lexical meaning (a container with a flat base and sides, typically square or rectangular and having a lid). In the motorcycle community itself, this unique word has meaning Extra luggage behind the motor. Usually, box in the motorcycle community is not always square. The shape itself sometimes adjusts the bike. "Box" is placed on the right and left of the vehicle but most of the boxes are placed behind. To install a box, a bracket is needed.

The second word is "raiser" this word has meaning (Place to install the steering wheel). Raiser includes a unique word that is owned by the HSFCJ motor community. This is a register that has a lexical meaning (a thing that increases the amount, level, or strength of something).

## Data 4

This conversation took place at 13:54 on March 5, 2018. Figure 4.3 is obtained by the researcher from conversations in a WhatsApp group that talk about their motorcycle tires.

# Figure 4.3 Speedfreak

"Speedfreak" is another register word found by the researcher in conversations between HSFCJ members in the figure. In this community, the word "speedfreak" has the meaning of inconsiderate or mentions to people or members who drive recklessly. This unique word has a lexical meaning (speed;

how fast something moves, very fast movement, how fast something happens and freak: a thing, person, animal, or event that is extremely unusual or not like any other type). In a conversation above one of the members joked that he loved doing "speedfreak". Meanwhile, the HSFCJ is prohibited from speedfreaking, because this thing endangers their self and others.

# Data 5

Conversations occured on March 31, 2018. This conversation explains that some members gathered and meet somewhere.

Member 1	: Otw nang <u>sporttouring</u>
	(On the way to sport touring)
Member 2	: Otwe
	(On the way)
Member 3	: Ngopi nangdi?
	(Where do drink coffee?)
Member 4	: Piye cuacane?
	(What is the weather there?)

The conversation contains register Sporttouring. It has literary meaning (sport: a game, competition, or activity needing physical effort and skill that is played or done according to rules, for enjoyment and or as a job and touring: the journey to visit several places in a country or region for pleasure, especially as a holiday). In the HSFCJ community, "sporttouring" has contextual meaning as a place. In the community, this word has the meaning motorcycle shop. The conversation above shows that one member is on a journey to "sporttouring". The other members decide to meet where and other members ask how things are there.

# Data 6

This data occured in a group conversation when one member asks about a motorcycle. This conversation occurred on March 7, 2018.

Member 1	: Bensinku kok gelis entek kenek opo rek
	(How come my gasoline runs out quickly, that's why
	my friends)
Member 2	: <u>CCne</u> jalok dicilikno titik bro
	(The CC asked for a slight reduction bro)
Member 3	: Jawaban super
	(Super answer)

The word that is registered in this conversation is "CC". This word has a lexical meaning (cubic centimeter). In the HSFCJ motor community, this word means knowing how fast the motor is. It can also be interpreted as the motorcycle's speed capacity from members. The conversation above occurred when one member asked why the bike could be wasteful of fuel. Then another member answer that "CC" from the vehicle needs to be reduced.

# Data 7

April 8, 2018, in a conversation explaining that one member asks where the other is.

Member 1	: Posisi
	(Position)
Member 2	: Gubeng
	(Gubeng)
Member 3	: Otw ploso
	(On the way Ploso)
Member 4	: Gak nak <u>hombes</u> ta
	(Don't come to Hombes)

The underlined word is the register contained in the conversation. In HSFCJ this word means "Home Basecamp". For members of the home basecamp community is a place that is used as a club secretariat, hangout, relax fellow members or also to entertain if there are guests from other areas. Whereas the word home basecamp has a lexical meaning (home: the house, apartment, etc. where you live, especially with your family and basecamp: a place where food and general supplies are kept, especially for people climbing a mountain).

# Data 8

Conversation when one member asks about who departed to follow the national meeting. This conversation is taken on April 09, 2018.

Member 1	: Rek
	(Bro)
Member 2	: Opo tri?
	(What's the matter?)
Member 3	: Seng <u>gas</u> munas sopo ae rek?
	(Who gas to munas, anyone?)
Member 4	: Aku gak tri, aku bikers kota kota tok gak wani
	adoh
	(I'm not tri, I'm just bikers in town, and I don't dare
	to be far away)

The above conversation contains the "gas" register. This has a lexical meaning (petrol a liquid is obtained from petroleum, fuel, cars and other vehicles). This conversation talks about one member asking who will go to the national assembly. Then some members responded to the question. The unique word "gas" in the HSFCJ motor community has the meaning departing or can I mean to participate also can be interpreted to take a ride or start a drive can also mean I am coming.

### Data 9

The researcher got this data on 10 April 2018. The researcher got figure 4.4 contains some members who joked with other members.

This conversation occurs between prospective members and official members. In this conversation, the researcher found the unique word register "newbie". A word that has a lexical meaning (someone who has just started doing an activity, a job, etc.). In the HSFCJ motorcycle community environment means the new kid or call a bar boy who does not know anything yet.

# Data 10

This conversation took place on April 11, 2018. This conversation

contains about one member of the HSFCJ asking for help to help others.

Member 1	: Arek DBS kampas e entek nang perbatasan
	jombang pare
	(Member from the community DBS pads to run out
	on the border of Jombang and Pare)
Member 2	: May day may day, minta tolong kampas rem depan
	abis, beat 2009 posisi lepas pare perbatasan
	jombang 085855480445 fajar
	(Ask for the front brake pads to run out, beat 2009,
	the position of the border crossing pare and
	jombang 085855480445 fajar)

The underlined word is the register that the researcher found in this conversation. The word register is "may day may day". This word has a lexical meaning (a special radio signal sent from a ship or an aircraft when it needs help). Whereas in the HSFCJ motorcycle community "May day may day" has meaning, or anyone who drives a motorcycle that needs help as in the conversation above, there is a user of a beat motorcycle who needs help. Then one member asks for help through the group so that someone helps.

### Data 11

This data is a figure of information to do the trip. This information is coming from the HSFCJ motor community member who wants to travel. This conversation took place at 11:50 on March 30, 2018.

tanggal 29 april 2018. Guna untuk mempererat dan kekompakan keluarga HSFCJ, diharapkan untuk mengikuti tourwis kali ini. Tikum diPOM MOJOSONGO Pada pukul 06.00 can start engine jam 06.30 Nb. Untuk mempercepat waktu keberangkatan dimohon untuk datang lebih awal 🙏 🙏 Sekian terima kasih Cc Pengurus HSFCJ

Figure 4.5 Start Engine

From the figure above shows the word "Start engine" as a register. In this motorcycle, the word "start engine" has the meaning of leave or can also be interpreted as informing members of a trip or event will begin if pronounced to remind several other members. In this figure, one of the core members reminds other members. As for the lexical meaning of registering "start engine" is (start: to

begin at one point and then move to another, in distance or range and engine: uses the energy from liquid fuel to produce movement).

# 4.1.2.2. Indonesian Register in HSFCJ

Register in Indonesian word consist of sixteen unique words, they are "pengondisian", "pantauan", "kopdargab", "kopsan", "cibi", "penjemputan", "izin melintas", "ban cacing", "postic", "NRA", "R 26", "breket", "tourwis", "#086".

# Data 1

3 April 2018 at 09.35, one of the members of HSFCJ invites several other members to meet.

Member 1	: Jumat <u>kopsan</u> okay
	(Let's do kopsan, on Friday!)
Member 2	: Okay
	(Okay)

March 28, 2018, at 08.32, one member remembers about kopdargab and

responded by several other members.

Member 1	: Pagi H-4 <i>Kopdargab</i> , kompak dan semangat
	yaah (Morning H-4 Kopdargab, keep solid and don't
	give up!)
Member 2	: Pagi
	(Morning)
Member 3	: Aduh gak bisa ikut
	(Ouch, cannot come)

In the first conversation, the researcher found the register word "kopsan", in the second conversation "kopdargab". All two are Indonesian registers. They have lexical meaning "kopsan" (kopi santai/coffee casual), and kopdargab (kopi darat gabungan/ground coffee combined).

The contextual meaning understood by members of the HSFCJ motor community is "Kopsan" means Gathering out of schedule, usually in unexpected places and attended by unofficially and officially members. "Kopdargab" means gathering fellow members of the motor community from other regions, sometimes depending on the motor plate of a certain area.

The function of these three registers almost the same is to invite the gathering of all members of the motor club HSFCJ. Kopsan is gathered with some members outside the weekly sudden gathering. Kopdargab functions for sharing, sharing knowledge and adding brotherhood with members from other regions.

# Data 2

March 15, 2018, at 10.19 the researcher got this data. Figure 4.6 is a screenshot of the conversation in the HSFCJ WhatsApp group. The conversation tells about the notification to all members to gather somewhere.

Figure 4.6 Pengkondisian and Up

From the image the researcher found their two registers are "pengkondisian" and "up". "pengkondisian" is the word register of the Indonesian language, if in English sane with word conditioning, and "up" is the word register from English. Both have the lexical meaning "conditioning: The process of training or accustoming a person or animal to behave in a certain way or to accept certain circumstances" and "up: Towards a higher place or position".

For contextual meaning "up" is a list word that has the meaning that there is an important conversation or announcement that other members need to know immediately. "Conditioning" also has a meaningful process before welcoming guests from other regional HSFC clubs or other motorcycle communities who ask to be accompanied. In HSFCJ the word "up" serves to remind other members to respond directly to the conversation or announcement not to be forgotten. HSFCJ's group has a lot of conversations every day. "Conditioning" functions to entertain or accompany members of HSFC from other areas or other motorcycle clubs that are passing in the area of Jombang and to strengthen the fraternity of fellow motorcycle riders other clubs.

### Data 3

This conversation was obtained on March 27, 2018. This conversation contains a report from one member that the task is complete.

Member 1	: <u><i>Penjemputan</i></u> samsat mojoagung ready
	(Pick up samsat mojoagung ready)
Member 2	: Semangat
	(Get excited)
Member 3	: Semangat yang bertugas
	(Enthusiasm for the person in charge)

The underlined word is a register in this conversation. The word is "penjemputan". In English, this word has the same meaning as "pickup ".

"Penjemputan" has a lexical meaning" proses, cara, perbuatan menjemput "(process, way, deed to pick up). In the HSFCJ motorcycle, the word "penjemputan" has the meaning of Pick up guests spot or picking members or guests from other areas who do not know the way somewhere pick-up. In the above conversation, it was discussed that the pick-up point in Mojoagung was ready while the other members responded by encouraging the members who served there.

### Data 4

March 07 2018 at 1:46 p.m. the researcher got the conversation data below. the conversation in the figure below talks about the price of a motorcycle tool.

Figure 4.7 R26

In the figure above, the researcher finds the unique word register "R26". This register has meaning (R: 18th letter in alphabet and 26: dua puluh enam (twenty six)). In the commitment of this motorcycle "R26" has the meaning of CBR motorcycle wheel. In the conversation above, one member said that the price of R26 was expensive compared to the wheels of other motorcycle brands.

# Data 5

The researcher found this data on April 11, 1018. Conversations contained jokes between members.

Mosok per 😒 😋	18:23
+62 857-3358-8904	~BachtiarRizkiA.C
Nggonceng box ae	ida usah breket
8	18:24
Di taleni nok jok kunu	18:24
+62 816-1536-2181	~Satrio
+62 857-3358-8904	

From the figure above the researcher found the word register "breket". The above conversation is a joke from one member. One of the members said " ngonceng box ae... ndak usah breket" (hump box ae ... no need to brackets). The word "breket" in the HSFCJ motor community has the meaning of an additional box buffer. This word shows an additional tool to put the box to be added to the bun because, on every motorcycle, there is no tool to install the box.

# Data 6

The researcher got this data on 15 March 2018 at 08.49. The conversation below contains an invitation to all members of the HSFCJ.

: Koyok e
(I think)
: <u>Tourwis</u> Yuk, akhir bln 4
(Come on tourwis, end of month 4th)
: Otewe
(On the way)
: Ayok

### (Come on)

The underlined word is the word register found by the researcher. The register is "tourwis". The lexical meaning of the word "tourwis" is (touring wisata, touring: visiting several places in a country or area to perform, compete, etc. and wisata: *bepergian bersama-sama (untuk memperluas pengetahuan, bersenang-senang, dan sebagainya); bertamasya* traveling together (to expand knowledge, having fun, etc.); sightseeing). In this word, community means Invite vacation members not to get bored with club activities, and add knowledge of new places on prospect members. In the conversation, one member invited to do tourism activities and is responded by other members.

# Data 7

This conversation took place at 14:10 on March 17, 2018. Figure 4.9 is a conversation conducted by one member, in this conversation one member gave information containing how to care for a motorcycle and appeal for caution.

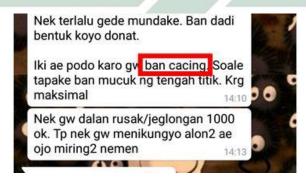

Figure 4.9 Ban Cacing

From the figure above the researcher found the word register "ban cacing". The lexical meaning of the register "ban cacing" is (ban/Tires: *benda bulat dari*  karet yang dipasang melingkar pada roda (sepeda, mobil, dan sebagainya) rubber round objects mounted on a wheel (bicycle, car, etc.) and cacing/worms: binatang kecil, melata, tidak berkaki, tubuhnya bulat atau pipih panjang dan tidak beranggota (ada yang hidup dalam air, tanah, perut manusia, atau perut binatang) small animals, creeping, legless, round or flattened and unmanned (some live in water, soil, human stomach, or animal stomach). In the community, this means the wheels of vehicles that are not in accordance with the Indonesian National Standard (SNI) and the indicators that are the tire is not SNI, not appropriate size.

# 4.1.2.3. Java Register in HSFCJ

The researcher got one register in Javanese word is "sowan".

#### Data 1

11.47, 06 April 2018 this conversation contains an invitation to a member to perform a joint activity. Then some of the other members agreed to leave.

Member 1	: Ayo <u>sowan</u>
	(Let's sowan)
Member 2	: Ayo
	(Come on)
Member 3	: Siap
	(Ready)

Member 1 says "sowan", this is the register of the HSFCJ motor community. Sowan is a register in Javanese. In Indonesian, the word "sowan" can be equated with the word visiting or if in English has the same meaning with the word "visit". The lexical meaning "visit: An act of going to see a person or place

as a guest, tourist, etc". In HSFCJ the unique word "sowan" has the contextual meaning of Sowan daily is visiting the house of one member, and Sowan requirement to be a member. Sowan can be done anytime according to the agreement of all members. In addition to getting the contextual meaning, the researcher also got the function of this register word. The function of this register is to strengthen the fraternity of fellow members or visit the sick and can also be a requirement to become a member and increase knowledge about other cities for prospects.

### 4.1.3. Function

After conducting research and conducting interviews with several active members of the HSFCJ motorcycle community, the researcher found the function of the register used by the community. In this case, the researcher found four functions of the use of the register. These four functions are to show intimation, to show prestige, to increase solidarity, and to show identity.

### 4.1.3.1. To Show Intimacy

Some words that show intimacy are "sowan". "Sowan" is usually said by HSFCJ members to call fellow members. This word serves to show intimacy between members of the HSFCJ motor community.

The function of "sowan" is to show intimacy between members. In this case "sowan" to strengthen the fraternity of fellow members or visit the sick and can also be a requirement to become a member and increase knowledge about other cities for prospects.

### 4.1.3.2. To Show Prestige

Some of the register words that show prestige are "prospect", "member", and "#086", "postic". The function of, the word "prospect", "postic", "#086" and member" are as a differentiator between the new members who are still undergoing the prospecting process with "members" who have become official members of the HSFCJ motor community. Usually, the word the "prospect" is written in the name of the new member and for the "member" is written the official member number behind his name.

### 4.1.3.3. To Increase Solidarity

The word register in the HSFCJ motor community that shows solidarity is the word "portal", "kopdargab", "tourwis". The use of some of the register words functions to show solidarity between community members. When this word is used in conversations between members of the community, such as the word "portal", only members of the community know and understand what they mean. Portal is "welcome party for guests (members) from other community (region), this treatment where members are served plenty of food or drink". Usually, the member who gives the "portal" is an official member. This portal serves to strengthen solidarity between members.

### 4.1.3.4. To Show Identity

The unique word register that shows identity in this community is the word "conditioning", "up", "monitoring", "box", "pickup", "R26", "speedfreak", "breket", "sporttouring", "cc", "homebase", "gas", "newbie". The use of the

register word above serves to show identity as a member of the HSFCJ motorcycle community. When using this word register only members understand the meaning of this word. The advantage of this register as an identity that is only understood by official members and prospect members, people outside the members will not understand the meaning of this word. When this word is automatically spoken, people know that he is a member of the motorcyclecommunity.

Like the word register "box" in the motorcycle community itself, this unique word has meaning behind the motorcycle extra luggage. Usually, the community motorcycle box is not always square. The shape itself sometimes adjusts the bike. "Box" is placed on the right and left of the vehicle, but most of the boxes are placed behind.

#### 4.2 Discussion

Wardhaugh (2006) stated that registers are sets of language items associated with different occupations or social groups such as surgeons, airline pilots, bank managers, sales clerks, jazz fans, and computer communities. Registers also often occur in motor communities. This study finds out registers in the Honda Street Fire Community Jombang motor community (HSFCJ). Two months the researcher made observations on WhatsApp group of this motorcycle community. The researcher got 42 word registers used by group members. From forty two data registers, the researcher found three types of registers used in this motorcycle community (they are shown in table 4.1). This answers the number one problem formulation in this study. The previous research (Fadila, 2015)

analyzes the meaning of register. She found 21 registers used in Shooter movie. Fadila found 19 words and 2 phrase words in English. This research found sixteen registers in Indonesian, twenty-four registers in English, and two registers in Javanese. The researcher also found a register in Indonesian and Javanese because this study got the data in the motorcycle community in Indonesia, especially in Jombang.

By conducting interviews with five active members of the HSFCJ motor community, the researcher obtained the function of the register used by this motorcycle community. Wardhaugh (2010) says that registering facilitates communication other than as a way to show identity and express feelings. The results of the interviews show that there are four functions of registers used by the group members. They are the function (1) to show intimation, (2) to show prestige, (3) to increase solidarity, and (4) to show identity. From this interview, the formulation of the second problem can be answered.

Mujiono, Fauza, and Wilujeng (2017) analysis register in Indonesian nurses. The results of their study show that there are six reasons for CHC nurses to use the register. They are (1) to show a professional identity, in this case the goal of the nurse to show self-identity as a nurse who is professional and understands terms in science about nursing and medicine, in contrast to showing identity in the motorcycle community who only wants to show that they are members of the motorcycle community (2) to provide communication effectiveness, (3) to prove the strength of the data, (4) to provide data security, these three functions of registers in nurses does not exist in the motor community

because the communication in the motorcycle community is not important to be secured and hidden. (5) To show prestige. In the nurse community the purpose of this register is to make nurses proud because only nurses know about drugs and drug terms, but in the motorcycle community, it used to show their entire member if someone joined their community. (6) To demonstrate integrity, goals in this register uses to show that they are truly capable in the medical field such as understanding what is diagnosing and how to treat it by talking to a patient. While in the motorcycle community no one needs to understand a particular field, in the motorcycle community the goals is to increase intimacy among members in the community and increase the solidarity of fellow members.

In research conducted by Mujiono, Fauza, and Wilujeng (2017) they found six registers of function in the nurse community. The six functions of the register of nurse communities are mostly to indicate that other person does not know the data from patients, they use registers to prevent patient data from leaking. Patient health and disease data are very important, therefore registers are used. So, only nurses and doctors have the responsibility to know and they must avoid people who know it and take advantage of hearing data. This is intended to avoid criminal acts.

Whereas, in this study researcher found that the four functions of registers used by the motorcycle community on average aim to strengthen brotherhood with fellow motorcycle community members. As in the register used by the HSFCJ motor community which has the aim of increasing solidarity, the purpose of using this register in the HSFCJ community is that fellow members, both prospect members, and core members can become solid. As well as the register function to show intimacy, in the HSFCJ motorcycle community it is intended that fellow members become more intimate with each other and kinship among members is better. Research conducted by Mujiono, Fauza, and Wilujeng (2017) and this research have results which are in accordance with the communities studied and the appropriate functions of each community.

Relating the two previous studies, this study added new results about registers, especially in registers used by the motorcycle community. This study fills the gap and reinforces the results of previous studies. Hopefully, by reading this research, readers can understand the word register and they can develop their knowledge in the sociolinguistic field.

#### CHAPTER V

# CONCLUSION AND SUGGESTION

This chapter is the final chapter of this research. There are two major parts of this chapter. First is the conclusion section and second is a suggestion. The conclusion provides a brief explanation of the results of the study and the suggestion for a future researcher which research related to this study.

# **5.1.** Conclusion

Based on the analysis performed, it indicates that register in Honda Street Fire Community Jombang (HSFCJ) is excised. The researcher concluded the finding that is able to reveal the answer of two research problems. First, after the researcher made observations on WhatsApp group of this motorcycle community in two months. The researcher got thirty two words of registers used by members of HSFCJ. From thirty two data registers, the researcher found three types of registers used in this motorcycle community. They are fourteen registers in Indonesian, seventeen registers in English, and one register in Java.

The second by conducting interviews with five active members of the HSFCJ motor community, the researcher obtained the functions of the register used by this motorcycle community. The results of the interviews show that there are four functions of registers used by group members. They are the function (1) to show intimation, (2) to show prestige, (3) to increase solidarity, and (4) to show identity.

All in all, from the finding of this research, the researcher has proved that the register is excised in Honda Street Fire Community Jombang (HSFCJ). This research is able to reveal the register word is used in the motorcycle community. Further, every word of the register has meaning and functions.

## 5.2. Suggestion

The suggestion is may be considered for the reader, future researcher of the register, and another. The register is an interesting topic to learn. Registers are common in our society. It also can happen in any group of social such as motorcycle community, nurse community, photographer, etc.

The researcher hopes this research can make the reader deepen their understanding about the register. Especially in the motorcycle community's register, they did know the use of motorcycle community register. Hopefully, this study will give a better understanding of the motorcycle community register because the researcher analyzes the register based on the real motorcycle community.

The researcher suggests to the next researchers who might conduct research in the field of registers to analyze other elements and use other methods. There are many ways to do research in the register field at different points of view. Subsequent researchers can also combine other theories to find new results. Other communities can also be an interesting new object to study.
