

teachers' assessment instrument. The researcher described the findings part. While in discussion part, the researcher discussed a regarding with how the assessment of student teachers and the causing factor of the weakness in their assessment.

### Findings

Research had been conducted from 26<sup>th</sup> May-12<sup>th</sup> June 2019. The researcher has gained the data of the student assessment instrument. From every practice teaching class; A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z, AA, AB, AC, AD, AE, AF, AG, AH, AI, AJ, AK, AL, AM, AN, AO, AP, AQ, AR, AS, AT, AU, AV, AW, AX, AY, AZ, BA, BB, BC, BD, BE, BF, BG, BH, BI, BJ, BK, BL, BM, BN, BO, BP, BQ, BR, BS, BT, BU, BV, BW, BX, BY, BZ, CA, CB, CC, CD, CE, CF, CG, CH, CI, CJ, CK, CL, CM, CN, CO, CP, CQ, CR, CS, CT, CU, CV, CW, CX, CY, CZ, DA, DB, DC, DD, DE, DF, DG, DH, DI, DJ, DK, DL, DM, DN, DO, DP, DQ, DR, DS, DT, DU, DV, DW, DX, DY, DZ, EA, EB, EC, ED, EE, EF, EG, EH, EI, EJ, EK, EL, EM, EN, EO, EP, EQ, ER, ES, ET, EU, EV, EW, EX, EY, EZ, FA, FB, FC, FD, FE, FF, FG, FH, FI, FJ, FK, FL, FM, FN, FO, FP, FQ, FR, FS, FT, FU, FV, FW, FX, FY, FZ, GA, GB, GC, GD, GE, GF, GG, GH, GI, GJ, GK, GL, GM, GN, GO, GP, GQ, GR, GS, GT, GU, GV, GW, GX, GY, GZ, HA, HB, HC, HD, HE, HF, HG, HH, HI, HJ, HK, HL, HM, HN, HO, HP, HQ, HR, HS, HT, HU, HV, HW, HX, HY, HZ, IA, IB, IC, ID, IE, IF, IG, IH, II, IJ, IK, IL, IM, IN, IO, IP, IQ, IR, IS, IT, IU, IV, IW, IX, IY, IZ, JA, JB, JC, JD, JE, JF, JG, JH, JI, JJ, JK, JL, JM, JN, JO, JP, JQ, JR, JS, JT, JU, JV, JW, JX, JY, JZ, KA, KB, KC, KD, KE, KF, KG, KH, KI, KJ, KK, KL, KM, KN, KO, KP, KQ, KR, KS, KT, KU, KV, KW, KX, KY, KZ, LA, LB, LC, LD, LE, LF, LG, LH, LI, LJ, LK, LL, LM, LN, LO, LP, LQ, LR, LS, LT, LU, LV, LW, LX, LY, LZ, MA, MB, MC, MD, ME, MF, MG, MH, MI, MJ, MK, ML, MM, MN, MO, MP, MQ, MR, MS, MT, MU, MV, MW, MX, MY, MZ, NA, NB, NC, ND, NE, NF, NG, NH, NI, NJ, NK, NL, NM, NN, NO, NP, NQ, NR, NS, NT, NU, NV, NW, NX, NY, NZ, OA, OB, OC, OD, OE, OF, OG, OH, OI, OJ, OK, OL, OM, ON, OO, OP, OQ, OR, OS, OT, OU, OV, OW, OX, OY, OZ, PA, PB, PC, PD, PE, PF, PG, PH, PI, PJ, PK, PL, PM, PN, PO, PP, PQ, PR, PS, PT, PU, PV, PW, PX, PY, PZ, QA, QB, QC, QD, QE, QF, QG, QH, QI, QJ, QK, QL, QM, QN, QO, QP, QQ, QR, QS, QT, QU, QV, QW, QX, QY, QZ, RA, RB, RC, RD, RE, RF, RG, RH, RI, RJ, RK, RL, RM, RN, RO, RP, RQ, RR, RS, RT, RU, RV, RW, RX, RY, RZ, SA, SB, SC, SD, SE, SF, SG, SH, SI, SJ, SK, SL, SM, SN, SO, SP, SQ, SR, SS, ST, SU, SV, SW, SX, SY, SZ, TA, TB, TC, TD, TE, TF, TG, TH, TI, TJ, TK, TL, TM, TN, TO, TP, TQ, TR, TS, TT, TU, TV, TW, TX, TY, TZ, UA, UB, UC, UD, UE, UF, UG, UH, UI, UJ, UK, UL, UM, UN, UO, UP, UQ, UR, US, UT, UU, UV, UW, UX, UY, UZ, VA, VB, VC, VD, VE, VF, VG, VH, VI, VJ, VK, VL, VM, VN, VO, VP, VQ, VR, VS, VT, VU, VV, VW, VX, VY, VZ, WA, WB, WC, WD, WE, WF, WG, WH, WI, WJ, WK, WL, WM, WN, WO, WP, WQ, WR, WS, WT, WU, WV, WW, WX, WY, WZ, XA, XB, XC, XD, XE, XF, XG, XH, XI, XJ, XK, XL, XM, XN, XO, XP, XQ, XR, XS, XT, XU, XV, XW, XX, XY, XZ, YA, YB, YC, YD, YE, YF, YG, YH, YI, YJ, YK, YL, YM, YN, YO, YP, YQ, YR, YS, YT, YU, YV, YW, YX, YY, YZ, ZA, ZB, ZC, ZD, ZE, ZF, ZG, ZH, ZI, ZJ, ZK, ZL, ZM, ZN, ZO, ZP, ZQ, ZR, ZS, ZT, ZU, ZV, ZW, ZX, ZY, ZZ.

### A. Research Findings

The research had been conducted from 26<sup>th</sup> May-12<sup>th</sup> June 2015. Here, the researcher has gained the data of the student assessment instrument and their lesson plan. From every practice teaching class; A, B, C, D, E, F, G, there are 24 student teachers who taught reading. Nevertheless, not all of them were able to become the research respondent. Two of them have refused to be analyzed or interviewed, and another three did not design reading test or task, although they taught reading in their practice teaching. In short, there were 19 students who become the research respondent here. The results of those findings are categorized based on the research questions of the study.

In case of finding how student teachers' assessment instruments fulfill the requirement of the standardization of cognitive or knowledge competency

assessment, the researcher had collected the data regarding with their assessment instrument and lesson plan. The researcher had tabulated the data of the student who taught reading by categorizing it form each technique and its level (*see appendix 3*). Then the researcher concludes the data by using chart to make the reader easily to interpret the data:

### Chart 4.1 Techniques in Assessing Reading

Based on chart 4.1, there are six different assessment techniques which were applied by the student teacher in their practice teaching. The detail of each technique and how they fulfill the test standardization will be explained below:

### a. Multiple Choice

In multiple choices, based on rubric which is adapted from Sri Wahyuni book, there are 21 indicators that need to be fulfilled (*see appendix*

1). Student teacher's assessment was analyzed based on the indicator, and their final score was categorized as follows;

- |         |           |
|---------|-----------|
| 1) Good | : 21 - 15 |
| 2) Fair | : 14 - 8  |
| 3) Poor | : 7 - 1   |

Those categorizations means, from 21 indicators in multiple choice, if the assessment are able to fulfill indicators 21-15 indicators, the assessment is categorized as good assessment. Then if the assessment is able to fulfill 14-8 indicators, it is categorized as fair assessment. The last is if the assessment is able to fulfill 7-1 indicators, the assessment is categorized as poor assessment.

### Chart 4.2 Multiple Choice Techniques

From chart 4.2, it can be seen that there were 3 student teachers who designed multiple choice test or task. Student A and B got 21 as his final score, it means that they had already fulfilled the requirement of

standardization test. While, student C got 20 as her final score, whereas she could not meet one of the indicators. Still, their assessment instrument design is categorized as good assessment.

### b. Descriptive Question

In descriptive question technique, based on the rubric which is adapted from Sri Wahyuni book, there are 12 indicators that need to be fulfilled (*see appendix 1*). Student teacher's assessment was analyzed based on the indicator, and their final score was categorized as follows;

- 1) Good : 12 - 9
- 2) Fair : 8 - 5
- 3) Poor : 4 - 1

Those categorizations means, from 12 indicators in descriptive question, if the assessment is able to fulfill the entire indicators 12-9 indicators, the assessment is categorized as good assessment. Then if the assessment is able to fulfill 8-5 indicators, it is categorized as fair assessment. The last is if the assessment is able to fulfill 4-1 indicators, the assessment is categorized as poor assessment.

3) Poor : 4 – 1

Those categorizations means, from 12 indicators in true and false, if the assessment is able to fulfill the entire indicators 12-9 indicators, the assessment is categorized as good assessment. Then if the assessment is able to fulfill 8-5 indicators, it is categorized as fair assessment. The last is if the assessment is able to fulfill 4-1 indicators, the assessment is categorized as poor assessment.

### Chart 4.7 True and False Techniques

From chart 4.7, it can be seen that there were 3 student teachers who designed true and false as the test or task. Student Q got 10 as his final score, which means he could not meet two of the indicator. While, student R got 12 as her final score which means she had already fulfilled the indicators. Then student S got 11 as his final score, whereas he could not meet one of the

2. Please write down the missing part from the text.
3. Please write down each of procedure text structure of the text.

If it uses interrogative question, there must be question mark (?) or if it uses command, there must be interjection mark (!)

*Causing factors* :According to student D, she stated that she realized that when using command question she have to use interjection mark. However she said that if she put interjection mark, it seemed like she forced the students to do the task. It was not a nice thing to see if in a question there was interjection mark, so she just omitted it. The point is, she does not like put interjection mark in question.

- b) *Weakness:* As displayed below, there is unclear instruction about how to answer the question

**Team Work!**  
Answer the following question  
with the best answer.

1. From the text, what is the function of procedure text?

Although there is instruction, but the instruction is not clear, students were asked to answer the question without any guiding how to answer the question.

*Causing Factors:* According to student D, she stated that her instruction was not really clear. She realized that at that time when

she taught the students, her students felt confused to do the task. She said that she just forgot to make it clearly. The point is, she forgot to make a clear instructions for her task.

## 3) Student F

*Weakness:* As displayed below, there is unclear instruction about how to answer the question. Student F only wrote “Guiding questions” over the questions list.

Guiding Question

1. Who built the places?
2. Where is the place located?
3. How do you describe the situation there?
4. When are these buildings built?
5. Please write down any information, do you think important?
6. Why the building was built?

*Causing factors:* Student F stated that she forgot to give instruction to the students. However, at that time she had already delivered the instruction orally. The point is she forgot to put the instruction.

## 4) Student G

a) *Weakness:* As displayed below, there is unclear instruction about how to answer the question. Student G only wrote “Question” over the questions list.

“Thank you very much for saying so.”

Nura observes this event from the backdoor. She cries happily for her changed into a mature, stable young man.

**Question:**

1. Who is Nura?
2. Who is Juna?
3. What's Juna's negative characteristics?
4. How does Nura teach Juna?

*Causing factors:* According to student G, she stated that, she did not need to put the instruction, the students might have understood well with what they had to do. The questions was under the text, so the students would just answer it based on the text. The point is, he assume that giving instruction is not important.

b) *Weakness:* As displayed below, the question depends on the previous question. Here, if students are able to answer the question in number 8, automatically they will be able to answer the question number 9, since the question is similar.

5. What leads Juna's life to his downfall?
6. What does Nura do to return the wealth of Juna's family?
7. Who first congratulates Juna when he regains success?
8. How do they congratulate Juna? What expressions are used?
9. What expressions are used by Juna's staff to congratulate him?
10. How does Nura feel about Juna's achievement?

*Causing Factors:* Accordig to student G, he did not realize that thing and forgot it. He just did it randomly. The point is, he forgot with that.

While, student P got 8 as her final score, whereas he could not meet one of the indicators. The detail of their weakness point and their reasons will be explained further below:

1) Student P

*Weakness:* As displayed below, student P put the question and the answer in a wrong place. Here student P asked his students to match the picture with the statement; he put all of them in one page.

Question

1. Match the pictures with the correct statement by writing the number of the sign beside the alphabet of the pictures in a piece of paper, example:  
Picture a = statement 1

a.

b.

From : +62851856485284

Aira, Tomorrow we have a lot of math assignments. Let's about study together at my house at 3 p.m. ☺ Call me if you can't

Aira

c.

d.

Statement:

1. The film will be played in IMAX

2. There will be a sale in Shoe Point

3. That is the sign of public toilet

4. Odin will watch the movie

5. A gas station is ahead

6. Shoe Point has good shoes

Answer

*Causing factors:* Student P stated that, he did not know that the question and answer in matching should be placed side by side. The point is he did not know that matching test should be placed like that.

### f. True and False

Based on the data in the first research question, there were 3 student teachers who designed true and false as the test or task. Student Q got 10 as

his final score, which means he could not meet two of the indicator. While, student R got 12 as her final score which means she had already fulfilled the indicators. Then student S got 11 as his final score, whereas he could not meet one of the indicators. The detail of their weakness point and their reasons will be explained further below:

1) Student Q

a) *Weakness:* As displayed below, student Q used quantitative word which is easily to guess

B. State T if the sentences are true and F if the sentences are false (based on the report text above).

1. The frogs have strings front legs. (\_\_\_)
2. Frogs have 3 chambers in their heart that enable them to breathe through their skin and lungs. (\_\_\_)

*Causing Factors:* According to student Q, she stated that she did not realize about that, and it was not really important thing. The most important thing was her students were able to do her task. The point is she did not think that it was an important thing.

b) *Weakness:* As displayed below, student Q arranged true and false statement randomly. It can be seen from the answer key.

**B. State T if the sentences are true and F if the sentences are false (do not report text above).**

## Questions

1. The frogs have strings front legs. ( )
2. Frogs have 3 chambers in their heart that enable them to breathe through their skin and lungs. ( )
3. All species of frogs protect themselves from their enemy by the poison glands in their skin. ( )
4. The frog's teeth can be found in the lower jaw. ( )
5. They are called amphibians because they could live only on land. ( )
6. They catch their prey by flipping out their tongue. ( )
7. Many frogs are used by human beings for experiments. ( )
8. Minnows, earthworms, bats, raccoon, and spiders are frog's prey. ( )
9. They have short front legs which is used to prop the frog up when sits. ( )
10. Frogs are invertebrate animals. ( )

B. State T if the sentences are true and F if the sentences are false (based on the report text above)

## Answer Key

1. F (the front legs or arms are short).  
2. T  
3. F (different species of frogs have different kinds of protection. Some have glands in their skin).  
4. F (they only have teeth in the upper jaw).  
5. F (amphibians' means that they live part of their life in water and the other part of it on land).  
6. T  
7. T  
8. T  
9. T  
10. F (frog are vertebrate animals (animals with backbones) known as amphibians).

*Causing Factors:* According to student Q, she stated that, she just made the question randomly and did not realize that the answer will form in sequence. The point is she did not realize if it was false.

2) Student S

*Weakness:* As displayed below, student S used quantitative word which was easily to guess.

### Task 1

Based on the information in the previous text, write T if the sentence is True or F if the sentence is False.

1. Monument National is a symbol of Indonesia independence. (.....)
2. The original declaration of independence document is placed in freedom hall. (.....)
3. The monument has two main halls inside. (.....)
4. The obelisk of the monument is coated with 35kg of gold. (.....)
5. Public is unable to see the city from the top of the monument. (.....)

*Causing factors:* According to student S, he stated that in the previous text, there was no statement about number, whereas the number is written in a word, so there was no problem if he wrote the number in the form of number in her task, but he also admitted that he forgot about it. The point is he forgot about it.

As stated previously, the researcher has been showed the result of the interview and the point of each interview. To make the researcher easier to interpret the data, the researcher tabulates the data as follows;

**Table 4.2** Weakness Point in Students Assessment and its Causing Factors

The Assessment Technique	Student's Name	Weakness Point	Causing factor
Multiple Choice	A	-	-
	B	-	-
	C	The negative statement is not in italic form or underline	The student forgot to change the word in italic or underline form.
Descriptive Questions	D	There is unclear instruction about how to answer the question.	She assumed that giving instruction is not important.
	E	The question is not the in the form of interrogative sentence or command which demand descriptive answer.	She does not like put interjection mark in question.
		There is unclear instruction about how to answer the question.	She forgot to make a clear intructions for her task
	F	There is unclear instruction about how to answer the	The point is she forgot to put the instruction.

		question.	
	G	There is unclear instruction about how to answer the question.	He assumed that giving instruction is not important.
		The question depends on the previous question.	He forgot with that.
	H	-	
	I	-	
Short Answer	J	-	
	K	-	
Fill in the Blank	L	The length of the full stop for the blank answer is not similar from one question to another.	She did not know that what she have done is wrong
	M	The length of the full stop for the blank answer is not similar from one question to another.	Student M was not aware to put the full stop must be in the same length from one question to another.
Matching	N	-	
	O	-	
	P	The question and the answer is not place in the right place.	He did not know that matching test should be placed like that.
True and False	Q	Use quantitative word which is easily to guess	She did not think that it was an important thing.
		The arrangement of true and false statement is not arranged randomly.	She did not realize if it was false.
	R	-	
	S	Use quantitative word which is easily to guess	He forgot about it

Instead of tabulate the data into table, the researcher have concluded the factors which made student teacher unable to fulfill the test requirement.

### Chart 4.9 Factors of Students' Weakness Point

From chart 4.9, it can be seen that, 31% of them stated that they forgot about the indicator that become their weakness point. Then 31% of them stated that they did not know about that indicator, so they did not implement it into their assessment. Another 31 % of them stated that the indicator that they could not meet was not an important thing to be aware; it did not give any effect to their assessment. The last one is 7 % of student teacher who stated that they did not like with the indicator, so they just ignored it.

## B. Discussion

In case of having the same interpretation between the reader and the researcher toward the finding of the research, this part discuss those findings by reflecting on some theories related to each following problems. Thus, the discussion is categorized based on the research questions of the study.

### 1. Student Teacher Assessment Instrument Based on Standardization Test.

As stated in the background, assessing students is one of the main duties of a teacher.<sup>1</sup> It becomes the evidence of the result in teaching and learning process. Especially for cognitive and knowledge assessment which become the focus of the research, both of them have the straight connection with the teaching purposes. Then, for student teachers who are going to face their internship program whereas they will teach the real class, designing the proper assessment becomes an important thing to do.

Based on the finding, there are 6 types of assessment technique which was applied by student teacher. Here some of their assessment has been able to fulfill the standardization whereas they got good level and some of them have been unable to fulfill some of the indicators in test standardization. However all of the assessment instrument was categorized as a good assessment instrument.

<sup>1</sup>Kunandar, *Penilaian Autentik* (Jakarta: Raja Grafindo Persada, 2014), 2.

a. Multiple choice

All of the student teachers who designed multiple choice test, their assessment was categorized as good assessment. In multiple choices, there were three students who designed this assessment. Two of them (student A and B) have been able to fulfill the test standardization, while student C could not meet one of the indicators. In her assessment, she used negative word in her question, the word “except” in her assessment, but she did not form it in italic or underline. Actually, in multiple choices, if the word is in the form of negative statement or word, we have to write the word in italic or underline.<sup>2</sup>

to fulfill this indicator either. Here they did not write a clear instruction for their task. As their instruction, student D and G only wrote “*questions*” over the questions list, while student F only wrote “*guiding questions*” over the questions list, student E wrote “*answer this following question with the best answer*”. In descriptive question writing a clear instruction is a must.<sup>3</sup> Before they set the test or the task, they gave a text to their students, since they taught reading. In contrast, in their instruction they did not give any instruction related with the relationship between the reading text and the task that they had given.

Both of students E and G could not meet two of the indicator, instead of making unclear instruction for the task; they still had another indicator that they could not meet. Student E did not form her question in interrogative sentence or command. Actually the statement of her question is in the form of command question and she put full stop in the end of the question. Using command sentence as her question, she supposed to add interjection mark in the end of the sentence, not a full stop.

The next one is student G, here he wrote the question which was related to each other. It means that, the question depends on the previous question. If his students were able to answer the question in number 8, automatically they would be able to answer the question number 9, since

<sup>3</sup>Sri Wahyuni, *Assessmen Pembelajaran Bahasa...*, 53.

the question is similar. However in descriptive questions, the question must be different from each other, whereas every question is designed to have different aim, meaning and answer.<sup>4</sup>

c. Short Answer

In this technique, there were 2 student teachers who designed short answer test or task. In this technique, they supposed to meet 6 of the indicators. Both of the students J and K got 6 as his final score, it means that they had already fulfilled the requirement of standardization test. All of the six criteria which become a reference of the test standardization have already met by this student teacher.

### d. Fill in the Blank

In fill in the blank, the categorization of students score was in good level. Here, there were 2 student teachers who designed fill in the blank as a test or task. In this technique, they supposed to meet 9 of the indicators. Both of students L and M get 8 as their final score, whereas they could not meet one of the indicators.

Both of student L and student M had the same weakness on their assessment. Here, the length of the full stop in their question was not similar from one question to another. In fill in the blank they supposed to put the length of the full stop similar from one question to another.<sup>5</sup> If

<sup>4</sup>Sri Wahyuni, *Assessmen Pembelajaran Bahasa ...*, 54.

<sup>5</sup>Kunandar, *Penilaian Autentik...*, 204.

the length of the full stop is not similar, it seems like the teacher facilitate the students to guess the answer.<sup>6</sup> If the full stop is long, it means that they need to answer with a long word. Then, if the full stop is short they need to answer with a short word.

e. Matching

In matching, In matching, all of the students' final score was categorized as good assessment. However, not all of them could meet all of the indicator. There were 3 student teachers who designed matching test or task. In matching their assessment supposed to fulfill 9 of the indicators. Both of students N and O got 9 as his final score, which means they had already fulfilled the requirement of standardization test. While, student K got 7 as her final score, whereas he could not meet two of the indicators.

First, student P did not place the question and the answer in the right place. Here, he asked her students to match the picture with the statement. Actually when designing matching test, the question and the answer must be placed side by side, whereas the question is on the left side and the answer in the right place.<sup>7</sup> Here he put all of them in one page. Instead of placing the question and answer side by side, the question on the left must be placed with number while the answer on the

<sup>6</sup>Kunandar, *Penilaian Autentik...*, 204.

<sup>7</sup>Kunandar, *Penilaian Autentik...*, 208.

right must be placed with alphabet. However, student P upended it; he wrote the question with alphabet and the answer with number.

f. True and False

In this technique, in this technique all of student teachers assessment was categorized as good assessment. there were 3 student teachers who designed true and false as the test or task. In true and false they supposed to fulfill 12 of the indicators. Here, student R got 12 as her final score which means she had already fulfilled the indicators, while student S got 11 as his final score, whereas he could not meet one of the indicators. And Student Q got 10 as his final score; it means that he could not meet two of the indicator.

In this case, both of student S and Q have the same weakness point whereas they use quantitative word in their question. Using quantitative word in true and false technique might facilitate the student to easily guess the question meaning.<sup>8</sup> Here, the student's attention will be directly to the number.

Here, student Q still has another indicator which was unable to fulfill by him. He arranged the answer of the question in sequence, it can be seen from his answer key, from number 6 up to 9, the answer key is

<sup>8</sup>Kunandar, *Penilaian Autentik...*, 206.

(T). In true and false the question has to be designed randomly, not in sequence.<sup>9</sup>

In short, all of the student teachers are able to design the assessment instrument properly. It can be proven by the categorization of their final score which was categorized as good assessment. Based on the finding, from all of the student teachers who designed the assessment, 47% of them have been able to fulfill the entire test requirement, 37 % of them could not meet one indicator, and 16 % of them could not meet two of the indicator. It shows that, although student teacher are still trained about how to be a good teacher they have had a good ability in designing the assessment.

## 2. The Causing Factor of the Weakness Indicator that Could not be Fulfilled by Student Teacher

The indicator which was unable to fulfill by the student teacher is caused by some factors. In this study, the data of the causing factor of the weakness indicator that could not be fulfilled by student teacher was obtained from the interview result. By finding the weakness factor, it can become the reference for student teachers who are going to face their internship program, to be aware of their previous fault, since in internship program they will deal with the real class. Based on the finding above, the factors which influenced the weakness point of their assessment instrument is categorized as follows.

<sup>9</sup>Kunandar, *Penilaian Autentik...*, 207.

a. Forget about detail

This factor was stated by 31% of student teachers who designed multiple choice and descriptive question. Here, in the form of multiple choice and descriptive question they have to write the instruction how to do the question, and most of them forgot about it. Some of them stated that they did it in rush, so they did not pay attention on the detail. Still, whether they did it in rush or not, they have to pay attention on the detail. The detail will make the assessment is able to assess what it needs to assess.

b. Assumed that it was not important thing

This factor is stated by 31% of student teachers who designed descriptive question and true and false assessment. When the researcher showed them about the indicator that they were unable to meet, they just thought that the indicator was not important and there was no use to us it in their assessment. Still, the indicator of the standardization test is designed to help the teacher in designing a good assessment for their student, so every single indicator is designed to have its own objective.

c. They did not know about that indicator

This factor was stated by 31% of student teachers who used fill in the blank, matching and true and false technique. They did not know if the indicator which they were unable to meet is the test requirement. In this case before designing the assessment, they should search for the

information of how to design the proper assessment and the requirement of designing it, so in the following time, this will not happen anymore.

d. They did not like with it

It is a unique reason which was started by 7% of the student teachers who designed descriptive questions. She did not like put the interjection mark in the statement, so she omitted it. In this case, whether they like it or not, they have to stick with it, since designing assessment is not based on their preferences, it is about how to design the standardization assessment which is able to assess the students properly.
