CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

After analyzing the data, the writer summarized some important conclusions from the research. Register is variety 'according to the use'. It is the ways of saying different things and tend to differ in. In each community may have different register used because they have different topic and background of doing communication.

The writer found 66 words which are considered as the registers used by business community in *The Merchant of Venice* drama. Those words had the meanings which related to the topic of busines terms. Those words are classified into parts of speech. There are 38 nouns, 18 verbs, 8 adjectives, and 2 nouns phrase. The vocabularies here is also considered include in the part of classification as social group specific vocabulary.

The factor of the used of register in business community is including in the three factors. They are 'field, mode and tenor' factor. Those factors are considered to affect the used of register because the society background of this community, the status of the participant and the purposes of this community became the big reason of the used of register in their society. The social background as a merchant, debtor and creditor are considered the social factor that influenced the used of one language in their society, especially in business. The social setting in this community involves the setting in bussiness context which communication

takes place. It also includes the business purpose and topic of the communication process.

The purposes of the used of register in this drama are for doing business transactions, making a productivity, showing their identity as a merchant, showing the background of their occupation as a merchant, and the important purpose is for the tools of their communication in daily life.

5.2 Suggestion

Language is dynamic. As long as human use language for communication, language will always develop and improve all the time. Register is language variety based on its use. There are still many cases on the study of register. This field can still be studied from different point of view. It is suggested to the other researchers to conduct a research about register with different point of view and different source of data. Besides, the students are able to use this research as a reference to improve their knowledge in sociolinguistics study.
