

INTISARI

Tujuan penelitian ini adalah untuk mengetahui hubungan antara kecerdasan emosional dengan self directed learning pada siswa siswi MA Bustanul Ulum. Penelitian ini dilakukan pada kelas XI MA Bustanul ulum dengan populasi 114 siswa. Dari jumlah tersebut dipilih 37 responden sebagai sampel penelitian dengan menggunakan teknik purposive sampling. Penelitian ini menggunakan pendekatan kuantitatif dengan menggunakan metode koresisional. Pengumpulan data dengan teknis berskala likert, yaitu skala kecerdasan emosional dan skala *self directed learning*. Skala kecerdasan emosional memiliki 41 aitem setelah uji coba dengan nilai reliabilitas 0,618, sedangkan skala *self directed learning* memiliki 21 aitem valid setelah uji coba dengan reliabilitas 0,630, penghitungan validitas dan reliabilitas dengan bantuan program SPSS 16,0 Hasil penelitian ini diperoleh nilai korelasi ($0,588 > r_{tabel} 0,244$) sehingga hipotesis alternatif (H_a) diterima. yang artinya terdapat hubungan yang signifikan antara kecerdasan emosional dengan *self directed learning*.

Kata Kunci:kecerdasan emosional, self directed learning

ABSTRACT

The purpose of this research is to know the correlation between emotion question and self directed learning. This research was done to studen MA Bustanulul Ulum by having 114 populations. This research takes 37 respondents as the research sample by using purposive sampling technique. This research uses quantitative approach by correlation method. It uses likert of scale model which is as a scale of emotional question and scale self directed learning of decision to collect the data. Scale of emotional question has 41 items after being tested by reliable score 0618. whereas likert of self directed learning has 21 valid items after being tested by having reliability 0.680. The calculation of validity and reliability uses a program of SPSS v.16,0. The result of this research is by having the correlation score (0,588) > r table 0,244 with the result that alternative hypothesis (H_a) is achieved. It means that there are significant correlation between brand image and the purchasing decision.

Keywod; Emotional question, self directed learning
