# CHAPTER III

# RESEARCH METHOD

This Chapter presents the research method used. Those are research design, instrument of the research, Data and source of data, Data collection, Data Analysis.

## 3.1 Research Approach

The researcher used qualitative method in this research for analysis the subject, because researcher used qualitative research the analysis is about discussing, analyzing and finding the Language style in this text of the movie. Qualitative research is from of social inquiry that focuses on the way people interpret and make sense of their experiences and the word on which they live. The study applied the descriptive qualitative research because the data are in form words in the text rather than number the writer result of the research contain quotation from the data illustrate substantiate presentation (Bogdan, 1982: 28)

## 3.2 Data source and Data

The data source of this research is taken from Fury movie.  The movie is gotten from internet.  the researcher downloads it using wifi.

As data source of this research is a movie, the data is taken from the characters of it. They are seven character in this movie that play more as follow: Brad Pitt, Logan Lerman, Shia LaBeouf, Michael Pena, Jon Bernthal, Jason Isaacs, and Scott Eastwood. All conversation or dialogue spoken by those characters are collected. The

data in form of talk or conversation which needed the script of movie that gotten from web www.subscene.com/Fury film 2014. The Main data is all sentence or text on script of Fury movie.

## 3.3 Research Instrument

Research instrument is very important to obtain the data of research for it is a set of method which is used to collect data. There are two kinds of instrument used in this research: human instrument and non-human instrument. The primary instrument of this study is the researcher himself as human instrument who selected, collected, and analyzed the data, and also reported the result of the study. Because of the data source is a movie, the researcher needs a laptop or computer (as non-human instrument) in visualizing the movie as a media.

## 3.4 Technique of Data Collection

In collecting data for this study, the researcher decided to do several technique to get any data to make an accurate data analysis. The first step was downloading the movie, from the internet in Ganool.com on Saturday, September 19, 2015, 20:30:PM and transcribing to format Microsoft Word 2007, to make easy to find the data language style to enable the researcher to analyse.

## 3.5.Technique of Data Analysis

The data will be taken from the script of Fury Movie, There some steps in getting the data:

1. For the first time, the researcher watched Fury movie.

2. Searching and browsing the script of Fury movie from internet to get textual form of dialogue.

3. After getting the transcript, the researcher marks or codes it only the data refer to type of language style .

4. The final step, the all marked data is classified into the type of language style in order to be easy to analyze, the researcher make a table to east yo share found the data

| No. | Language Style Kinds | Found data analysis |
|-----|----------------------|---------------------|
| 1   |                      | -                   |
| 2   |                      |                     |
| 3   |                      |                     |
| 4   |                      |                     |
| 5   |                      |                     |
| TOTAL DATA |               |                     |
