

was change our culture especially language. And from appreciative standard we were decided whether we reacted positively or negatively through the use of swear words.

## **5.2 Suggestion**

For further research, the researcher suggests that it was be better to do a research on the phenomenon of using swear word by female characters because nowadays many female also use swear words in daily conversation.

To solve the problem of the existence of using swear words in the daily communication, there must be real steps. It means we should just not stop in talking. There should be guidance and counseling about the use of swears word over the students, youths and even the educators and academic circles.

At last from the movie “The grey”, the researcher would say that the only best and affective way to prevent the use and abuse of using swear words in our daily communication was improving the religious life.

At least, I hope this thesis will give advantages to all sides, especially education world. And the researcher suggest to the next researcher have research this topic in other. Finally, the researcher hope this researcher can give beneficial contribution to people and reader especially to the researcher who will conduct a research will the same topic as this research by using other theories that more complete and better.
