ABSTRACT

Perdana, R.A. (2023). *Varieties of English Dialects Spoken in Doped Up & Dyin' Podcast Episode 60*. English Literature Department, Faculty of Adab and Humanities, UIN Sunan Ampel Surabaya. Advisors: (I) Murni Fidiyanti, M.A., (II) Suhandoko, M.Pd.

This study focused on dialect analysis, one of the branches of discussion of language variety. The theory is based on the idea that language is variable and changing, so the speakers may vary in their pronunciation, word choice, or grammar. Dialect also appears due to several factors from the speaker's life background. Therefore, this study answered the problem of study about the patterns of the English dialect spoken by Dylan J. Negri as an American, the patterns of the English dialect spoken by Pandji Pragiwaksono as an Indonesian, and the factors that influence the speakers use their particular dialects.

This study identified the dialect pattern using qualitative methods. This method is suitable for this study because studying dialect variations requires an approach to answer the question of how something can happen. With the descriptive method, the elaboration of the speaker's background can be more easily understood by the reader—that way, this descriptive elaboration can make it easier to collect data qualitatively. The researcher identified, classified, analyzed, and drew conclusions about the language variation by each feature.

The findings show that phonological features have a high frequency of occurrences. This feature becomes dominant in Northern American and Indonesian English dialects. In the Northern American English dialect, dropping the syllabic /r/ sounds is the most frequently used feature in Northern American phonology, with 38% or 27 data out of 70 total data. In the Indonesian English dialect, the tight sound of /r/ is the most occurring phonological feature, with 66% or 59 data out of 89 total data found. It can be concluded that it is formed from how a person grows and develops. The background they live in, how they were educated, how they relate to the environment, and what kind of social class they come from influence a person's use of their dialect. From those factors, the diversity of language variations is created.

Keywords: language variation, dialect, phonological feature, vocabulary variation, grammatical feature.

ABSTRAK

Perdana, R.A. 2023. *Ragam Dialek Bahasa Inggris yang Diucapkan di Doped Up & Dyin' Podcast Episode 60*. Program Studi Sastra Inggris, Fakultas Adab dan Humaniora, UIN Sunan Ampel Surabaya. Pembimbing: (I Murni Fidiyanti, M.A., (II) Suhandoko, M.Pd.

Penelitian ini berfokus pada analisis dialek yang merupakan salah satu cabang dari pembahasan variasi bahasa. Teori ini didasarkan pada pemikiran bahwa bahasa itu bervariasi dan berubah-ubah, sehingga penuturnya bisa saja berbeda dalam pengucapan, pilihan kata, atau tata bahasanya. Dialek juga muncul karena beberapa faktor dari latar belakang kehidupan penutur. Oleh karena itu, penelitian ini akan menjawab masalah penelitian tentang pola dialek bahasa Inggris yang diucapkan oleh Dylan J. Negri sebagai orang Amerika, pola dialek bahasa Inggris yang diucapkan oleh Pandji Pragiwaksono sebagai orang Indonesia, dan faktor yang mempengaruhi penutur menggunakan dialek tertentu.

Penelitian ini mengidentifikasi pola dialek dengan menggunakan metode kualitatif. Alasan mengapa metode ini cocok untuk penelitian ini adalah karena untuk mempelajari variasi dialek diperlukan pendekatan yang dapat menjawab pertanyaan bagaimana sesuatu dapat terjadi. Dengan metode deskriptif, penjabaran latar belakang penutur dapat lebih mudah dipahami oleh pembaca. Dengan begitu penjabaran deskriptif ini dapat mempermudah pengumpulan data secara kualitatif. Peneliti mengidentifikasi, mengklasifikasikan, menganalisis, dan menarik kesimpulan tentang variasi bahasa oleh masing-masing fitur.

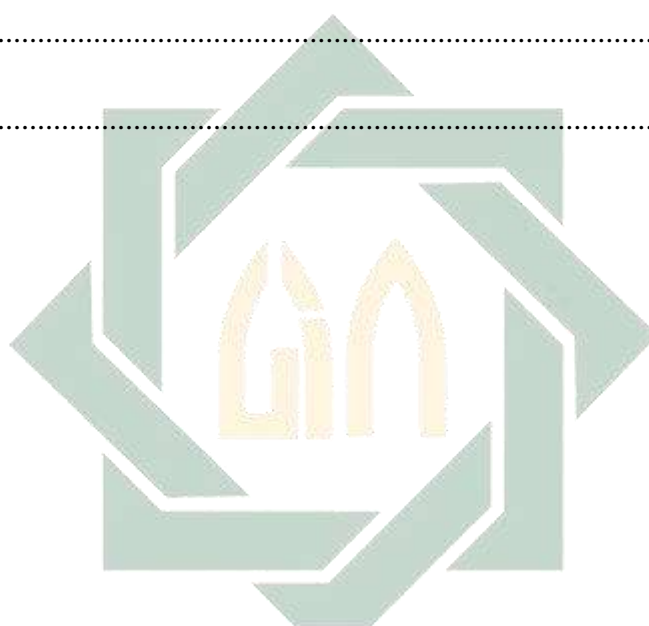

Dari hasil temuan tersebut, terlihat bahwa fitur fonologis merupakan fitur yang memiliki frekuensi kemunculan yang tinggi. Fitur ini menjadi fitur yang dominan baik dalam dialek bahasa Inggris Amerika Utara maupun dialek bahasa Inggris Indonesia. Pada dialek bahasa Inggris Amerika Utara, pelesapan bunyi silabel /r/ menjadi fitur fonologi yang paling sering muncul dengan persentase sebesar 38% atau 27 data dari total 70 data yang ditemukan. Sedangkan pada dialek bahasa Inggris Indonesia, bunyi rapat /r/ merupakan fitur fonologi yang paling banyak muncul dengan jumlah 66% atau 59 data dari 89 total data yang ditemukan. Dapat disimpulkan bahwa hal tersebut terbentuk dari bagaimana seseorang tumbuh dan berkembang. Latar belakang tempat tinggal, bagaimana mereka dididik, bagaimana mereka berhubungan dengan lingkungan, dan dari kelas sosial mana mereka berasal merupakan faktor-faktor yang mempengaruhi seseorang untuk menggunakan dialeknnya masing-masing. Dari faktor-faktor tersebut, terciptalah keanekaragaman variasi bahasa.

Kata Kunci: variasi bahasa, dialek, fitur fonologis, variasi kosakata, fitur tata bahasa.
