CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion and suggestion dealing with the finding of the analysis. In present the summary of the finding which is discussed in the previous chapter and the suggestion for the readers.

5.1 Conclusion

In fact, nowadays many people use swear words in their communication as a habit in their conversations. Their used swear words with many purpose, they used swear words to show angry expression, to mock or to insult, and they used swear words also to jokes and call some one.

Based on the finding in the chapter four, the researcher find out six types of swear wordsthat used in facebook by Javanese facebookers, those are: copulative terms, excretory terms, name of certain scary creature, sexual irregularities terms, animal terms, and body terms.

In additional, the Javanese facebookers uses swear words also based on several reasons which supported it. Those reasons are to creating attention, to discrediting, to provoking violent confrontation, to express the

emotion, and to term of endearment. The writer also find that the Javanese facebookers used swear words without purpose or their habit.

5.2 Suggestion

Based on the limitation of the researcher in doing this study, this research can be continued by further researcher by using different approach and focus of this study. For the further research, the writer suggests that it will be better to research the phenomenon of using swear words by male facebookers because nowadays many male facebookers also use swear words in their post.
