

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

Based on the research finding and discussion, the researcher has conclusion about students' perception about their reading attitude toward academic journal article. It was found that:

1. Students' perception about their reading attitude toward academic journal article was weak, it was known from the strong criterion data. There were 46% from the positive component, and there were 86.6% from the negative component. It indicated that the data from positive component lower than the data from negative component.
2. There are four factors which influence students' reading attitude toward academic journal article. Students' believe that academic journal is important, students comfortable, students' interest, and difficulties in reading factors. In addition, the factor that influence mostly found on the value or students believe about the important of academic journal article with the percentage 84.4%. The second, from the students' difficulty in reading academic journal article was 72%. On the contrary, students' comfortable and students interest toward academic journal article were low, the comfortable was 34.6% and for interest was 41.3%.

## **B. Suggestion**

Based on the research, the researcher would like to give the following suggestions:

1. The lecturer of reading four should give the interesting strategies in managing the class of reading. In addition the lecture should give the topic of academic journal article based on the student's interest. It will help the students become interest in the class of reading and motivate students to read academic journal article more.
2. Academic journal article is very important to the students, especially of students' English Education Department. Therefore, the students should develop their interest in reading academic journal article. Therefore, it will make the students motivate to read more academic journal article and influence their reading attitude toward academic journal article.
