ABSTRACT

Fauziyah, Zahroh Nurul (2025) *Learning Community In ELT Classes In Indonesia: A Meta-Synthesis Study*. A Thesis. English Language Education Department, Faculty of Tarbiyah and Teacher Training, UIN Sunan Ampel Surabaya. Supervisors I: Dr. Siti Asmiyah, M. TESOL. Supervisors II: M. Hanafi, MA.

Keywords: *English Language Teaching, Indonesian Student, Learning Community, Student Learning Community*

Learning community plays crucial roles not only in the teaching and learning process but also in the achievement of the targeted competencies. This meta-synthesis study delves into existing studies reporting learning communities in Indonesian ELT context. Analyzing 13 articles relevant to the inclusion criteria, data was collected and analyzed using systematic review. Using the main theoretical frameworks of the learning community proposed by Lenning et al. (2013), the findings suggest the following. The type of learning community reported is the student learning community under two subtypes of course/class, external and mixed student learning communities. Mixed student learning community in particular is a new type found in this study. The activities reported include group discussion, speech, role play, reading aloud, storytelling, guess activity, and group study. The benefits are improvement in skills, encouragement of collaboration, and stronger sense of independence and leadership abilities. Limited resources, uneven participation and engagement, managing large groups, limited facilitation time for teachers, lack of desire to do assignments, and participating in activities on time are among the problems reported in the conduct of the student learning community in the Indonesian ELT context. These findings imply the learning community ensures effective facilitation, creating an engaging and supportive environment for English learners.

ABSTRAK

Fauziyah, Zahroh Nurul (2025) *Learning Community In Elt Classes In Indonesia: A Meta-Synthesis Study*. A Thesis. English Language Education Department, Faculty of Tarbiyah and Teacher Training, UIN Sunan Ampel Surabaya. Supervisors I: Dr. Siti Asmiyah, M. TESOL. Supervisors II: M. Hanafi, MA. Keywords: *English Language Teaching, Indonesian Student, Learning Community, Student Learning Community*

Komunitas pembelajaran memainkan peran penting tidak hanya dalam proses belajar mengajar tetapi juga dalam pencapaian kompetensi yang ditargetkan. Studi meta-sintesis ini menyelidiki studi yang ada yang melaporkan komunitas pembelajaran dalam konteks ELT Indonesia. Menganalisis 13 artikel yang relevan dengan kriteria inklusi, data dikumpulkan dan dianalisis menggunakan tinjauan sistematis. Menggunakan kerangka teoritis utama komunitas pembelajaran yang diusulkan oleh Lenning dkk. (2013), temuan menunjukkan hal berikut. Jenis komunitas pembelajaran yang dilaporkan adalah komunitas pembelajaran siswa di bawah dua sub tipe kelas, komunitas pembelajaran siswa eksternal dan campuran. Komunitas pembelajaran siswa campuran khususnya adalah jenis baru yang ditemukan dalam penelitian ini. Kegiatan yang dilaporkan meliputi diskusi kelompok, pidato, permainan peran, membaca nyaring, mendongeng, kegiatan menebak, dan studi kelompok. Manfaatnya adalah peningkatan keterampilan, mendorong kolaborasi, dan membangun rasa kemandirian dan kemampuan kepemimpinan. Sumber daya yang terbatas, partisipasi dan keterlibatan yang tidak merata, pengelolaan kelompok besar, keterbatasan waktu fasilitasi bagi guru, kurangnya keinginan untuk mengerjakan tugas, dan partisipasi dalam kegiatan tepat waktu merupakan beberapa masalah yang dilaporkan dalam pelaksanaan komunitas belajar siswa dalam konteks ELT Indonesia. Temuan ini menyiratkan bahwa komunitas belajar memastikan fasilitasi yang efektif, menciptakan lingkungan yang menarik dan mendukung bagi pembelajar bahasa Inggris.
