CHAPTER III

RESEARCH METHOD

This chapter discusses the methodology of the research. It consists of research design, subject of the research, research instrument, data and data sources, data collection and data analysis in order to make the researcher done with perfect result.

3.1 Research Design

This research uses a qualitative descriptive method which is explained and interpreted clearly defined based on the context. It is describes the data which are collected from the script of Rush Hour 2 movie by referring to the existence of linguistic elements without counting them statistically.

Qualitative research additionally includes such methods as observation of experimental natural settings, photographic techniques (including videotaping), historical analysis, document and textual analysis, sociometry, socio-drama and similar ethno-methodological experimentation, ethnographic research, and a number of unobtrusive techniques. Berg (2001: 3)

3.2 Subject of the research

The subject of this research is Mr. Carter, the character in Rush Hour 2 Movie, a person who speaks African American Vernacular English.

3.3 Research Instrument

The main instrument of this research is the researcher herself because the researcher was the primary instrument for collecting and analyzing data. As Miles

29

and Huberman in Dornyei (2011:38) stated that *"The researcher is essentially the main 'measurement device' in the study of qualitative,"* and they pointed out that *"The strengths of qualitative data rest very centrally on the competence with which their analysis is carried out"* (Dornyei, 2011:41).

3.4 Data

The data of this research are the script of utterances by Mr.Carter in *"Rush Hour 2"* Movie.

3.5 Data Sources

The data sources of this research are taken from *"Rush Hour 2" Movie,* it was downloaded from www.gomlab.com

3.6 Data Collection

In collecting the data, the researcher uses several steps, as follows:

a. The researcher downloads the movie and the script.

b. The researcher watchs the movie of *"Rush Hour 2" movie* repeatedly to find out the data which is going to be analyzed.

c. On the script the researcher underlines the utterances of Mr. Carter to analyze the grammar.

3.7 Data Analysis

After the data are collected, the researcher analyses the data with several to answer the question which is stated in the research problem in this research.

a. The researcher identify the utterances of Mr.Carter as the data based on grammatical analysis of African American Vernacular English (AAVE).

b.   The researcher categorize the utterances of Mr. Carter which is different from Standard English.

c.   Finally, after analyzing the data the researcher draws conclusion to summarizing the data into the table. Thus, the researcher knows which grammar is mostly different in Rush Hour 2 Movie as the way of Mr.Carter used the grammar.

Table 3.1

No	Types of Grammatical Features	Description	Corpus of AAVE in Rush Hour 2 Movie	Standard English
