## **CHAPTER V**

## CONCLUSION

This chapter is the last chapter of this research. This chapter consist of two part, they are conclusion of findings and suggestion for future research.

## 5.1 Conclusion

The researcher presents conclusion of the study. First, the researcher studied about types of directive speech acts in Surah An-Nisa' by using the theory of directive speech act Bach and Harnish as guidline. The researcher also explain the function of type directive speech act.

Based on the findings and discussion, it was found that Surah An-Nisa' used five types of directive speech act based on Bach and Harnish's classification. Surah An-Nisa' used questions, requirements, prohibitions, permissions and advices.

There are 76 data of directive speech act. The percentage of questions 1% (1), whereas requirements is 49% (37), prohibitions is 31% (24), permissions is 7% (5) and advices is 12% (9).

Related to the second question from this research, the researcher found that there are some functions of directive speech acts in Surah An-Nisa'. They are ask, command, permit, forbid and suggest. The most significant occurrences number is command.

## 5.2 Suggestion

The present study has focused on the types of directive speech act and the function to analyze translated text of Surah An-Nisa', it is a research that wish another research will analyze directive speech act more broadly with using different method, such as quantitative. The study about directive speech with quantitative method is rarely found. Another suggestion for future research can analyze another media except for Qur'an, such as Hadits.
