ABSTRACT

Nagara, Graena Pelangi. (2023). *THE DEVELOPMENT OF SOLAR SYSTEM SIMULATOR TO TEACH ENGLISH VOCABULARY AT ELEMENTARY SCHOOL*. Thesis. English Language Education Department, Faculty of Tarbiyah and Teacher Training, UIN Sunan Ampel Surabaya. Supervisors: Dr. Arbaiyah YS, MA. and Hilda Izzati Madjid, M.A.

Key Words: *Mobile Learning, Simulator, Solar System, English Vocabulary.*

This project aims to build an Android-based application for students at elementary school level. The application is called Solar System Simulator which students can use to better understand vocabulary about the solar system. This research project has two questions; (1) How is the development of a Solar System Simulator to teach English vocabulary at elementary school? (2) What are the challenges that students encounter while using this application? This project research is in the form of qualitative descriptive Research and Development (RnD), which adopts the ADDIE model for the project development process. This project uses guideline interviews as a tool for collecting data. The subjects of this project are 6 students at SDN Klurak Sidoarjo who are in class 6. There are two validators involved in the process of validating learning media and learning materials. The findings from this project are (1) The development of the Solar System Simulator application includes three phases (framework creation, application creation, and application publicity), (2) Analysis of both validation criteria and students' qualitative feedback revealed that students had some challenges related to using this app. The absence of sound effects as well as voice over, a slight lag when switching pages, and the challenge to be brave and get used to communicating and discussing with the teacher regarding the learning material being discussed.

ABSTRAK

Nagara, Graena Pelangi. (2023). *THE DEVELOPMENT OF SOLAR SYSTEM SIMULATOR TO TEACH ENGLISH VOCABULARY AT ELEMENTARY SCHOOL*. Tesis. Jurusan Pendidikan Bahasa Inggris, Fakultas Tarbiyah dan Keguruan, UIN Sunan Ampel Surabaya. Pengawas: Dr. Arbaiyah YS, MA. dan Hilda Izzati Madjid, M.A.

Kata Kunci: *Mobile Learning, Simulator, Tata Surya, Kosakata Bahasa Inggris.*

Proyek ini bertujuan untuk membangun aplikasi berbasis android untuk siswa pada tingkat SD. Aplikasi tersebut bernama Solar System Simulator yang dapat digunakan para siswa untuk lebih memahami pemahaman tentang tata surya. Penelitian proyek ini memiliki dua pertanyaan; (1) Bagaimana pengembangan Simulator Tata Surya untuk mengajarkan kosakata bahasa Inggris di sekolah dasar? (2) Apa saja tantangan yang dihadapi siswa saat menggunakan aplikasi ini? Proyek penelitian ini berupa Penelitian dan Pengembangan deskriptif kualitatif (RnD), yang mengadopsi model ADDIE untuk proses pembangunan proyek. Proyek ini menggunakan pedoman wawancara sebagai alat untuk mengumpulkan data. Subjek dari proyek ini adalah 6 orang siswa siswi SDN Klurak Sidoarjo yang duduk di kelas 6. Terdapat dua validator yang dilibatkan untuk proses validasi media pembelajaran dan materi pembelajaran. Temuan dari proyek ini adalah; (1) Pembangunan dari aplikasi Solar System Simulator mencakup tiga fase (pembuatan kerangka, pembuatan aplikasi, dan publisitas aplikasi), (2) analisis kedua kriteria validasi dan umpan balik kualitatif siswa mengungkapkan bahwa siswa memiliki beberapa tantangan terkait penggunaan aplikasi ini. Tidak adanya surara efek sekaligus voice over, sedikit lag saat pergantian halaman, dan tantangan untuk berani dan terbiasa berkomunikasi dan berdiskusi dengan guru terkait materi pembelajaran yang sedang dibahas.
