ABSTRACT

Nisa', I'annatun. (2024). *An Analysis of Linguistic Form in Medical Register New Amsterdam Movie Series (2018)*. English Literature Department, Faculty of Adab and Humanities, UIN Sunan Ampel Surabaya. Advisors: (I) Prof. Dr. H. Mohammad Kurjum, M.Ag., (II) Endratno Pilih Swawono, M.Pd.

This study aims to analyze the medical register, linguistic form, and function of the medical register used by the medical personnel characters in the *New Amsterdam* movie series (2018). The researcher used a qualitative descriptive approach to categorize the data in this study. In this study, the researcher used Halliday's 2014 register theory to help analyze the data. The data source used in this study is the *New Amsterdam* movie series season 1 episodes 1, 2, 3, 4, and 5, which aired in 2018.

The data collection technique used by the researcher is to search for text transcripts from the *New Amsterdam* movie series. The researcher watches the movie series while matching it with the transcript to ensure the truth between the transcription and the series. After that, the researchers categorized the medical register data based on the type of linguistic form, namely word and phrase.

The results of the analysis of the data that researcher have found concluded that there is a total of 63 medical register data in the *New Amsterdam* movie series season 1 in episodes 1, 2, 3, 4, and 5. The medical register data consists of 29 words data and 34 phrases data. From these results, each register has its own meaning and functions for efficiency in communication, to show identity and professionalism, and to provide information related to patient conditions, specific names of diseases, names of medical devices, and names of medical procedures. The use of medical registers used by medical personnel in the series greatly affects their speed in treating patients.

Keywords: Linguistic form, register, medical, *New Amsterdam*.

ABSTRAK

Nisa', I'annatun. (2024). *Analisis Bentuk Linguistik Dalam Register Medis Serial film New Amsterdam (2018)*. Program Studi Sastra Inggris, Fakultas Adab dan Humaniora, UIN Sunan Ampel Surabaya. Pembimbing: (I) Prof. Dr. H. Mohammad Kurjum, M.Ag., (II) Endratno Pili Swasono, M.Pd.

Penelitian ini bertujuan untuk menganalisis register medis, bentuk linguistik, dan fungsi dari register medis yang digunakan oleh karakter tenaga medis yang ada dalam serial movie *New Amsterdam*. Untuk menganalisis data pada penelitian ini, peneliti menggunakan metode deskriptif kualitatif. Dalam penelitian ini, peneliti menggunakan teori register dari Halliday (2014) untuk membantu menganalisis data. Sumber data yang digunakan dalam penelitian ini adalah serial movie *New Amsterdam* musim 1 episode 1, 2, 3, 4, dan 5 yang ditayangkan pada tahun 2018.

Teknik pengumpulan data yang digunakan oleh peneliti adalah dengan mencari transkrip teks dari serial movie *New Amsterdam*, kemudian peneliti menonton serial movie tersebut sambil mencocokkan dengan transkrip serial film untuk menjamin kebenaran antara transkripsi dan serinya. Setelah itu, peneliti mengelompokkan data register medis berdasarkan bentuk linguistik nya yaitu kata dan frasa.

Hasil analisis dari data yang sudah ditemukan peneliti menyimpulkan bahwa ada total 63 data register medis yang ada dalam serial movie *New Amsterdam* pada episode 1,2,3,4, dan 5 musim 1. Data register medis tersebut terdiri dari kata sebanyak 29 dan frasa sebanyak 34. Dari hasil tersebut setiap register memiliki makna tersendiri dan berfungsi untuk efisiensi dalam komunikasi, untuk menunjukkan identitas dan profesionalitas, memberikan informasi terkait kondisi pasien, nama spesifik penyakit, nama alat medis, dan nama prosedur medis. Penggunaan register medis yang digunakan oleh tenaga medis dalam series sangat mempengaruhi kecepatan mereka dalam memberikan penanganan kepada pasien.

Kata Kunci: Bentuk linguistik, register, medis, *New Amsterdam*.
